The Role of the State and Accounting Transparency Mohammad Nurunnabi,2016-03-17 Dr Mohammad Nurunnabi examines the factors that affect the implementation of International Financial Reporting Standards IFRS in developing countries and answers these specific research questions What is the relative impact of accounting regulatory frameworks and politico institutional factors on the implementation of IFRS in developing countries How do cultural factors affect said implementation How does a study of implementing IFRS help to build an understanding of a theory of the role of the state in accounting change in developing countries This follows a mixed methodology approach in which interviews are conducted IFRS related enforcement documents and annual reports are evaluated More than 138 countries have adopted IFRS yet the International Accounting Standards Board IASB does not provide an implementation index Financial reporting varies by country even within the area of the world that has apparently adopted IFRS and Nurunnabi offers an important viewpoint that considers the issues of IFRS implementation from various perspectives This is an invaluable resource for Undergraduate Masters and PhD students policy makers at local regional and international level namely the IASB World Bank IMF practitioners and users giving them the

necessary insight into the financial reporting environment and the state's attitude towards accounting transparency. Most importantly, this book contributes to military and democratic political regimes and the Max Weberian view of the theory of the role of the state's attitude towards accounting transparency. Europe's Place in Global Financial Governance after the Crisis Daniel Mügge, 2016-03-31 In the years leading up to the global financial crisis, the European Union (EU) had emerged as a central actor in global financial governance, almost rivalling the United States in influence. While the USA and the EU continue to dominate financial rule setting in the post-crisis world, the context in which they do so has changed dramatically. Pre-crisis ideas about laissez-faire regulation have been discarded in favour of more interventionist ones. The G20 and the Financial Stability Board have been charged with stronger coordination of global efforts. At the same time, jurisdictions have re-emphasized the need to get their own regulatory house in order before committing to further global harmonization. And through banks' failures and massive bail-outs, the financial sector hitherto a driving force behind the cross-border integration of finance has been reconfigured. This book asks a straightforward question: what have these and other key post-crisis trends in global finance done to the position that the European Union occupies in it? The contributions to this book analyse the link between financial governance in the European Union and on the global level from diverse theoretical angles and they cover the main issues that will shape the future European role on the global regulatory stage. This book was published as a special issue of the *Journal of European Public Policy*. **The British National Bibliography** Arthur James Wells, 2007 *Inside Accounting* David Leung, 2016-05-23 Based on a study covering a one-year financial reporting cycle at a commercial subsidiary of a well-known scientific research organization, *Inside Accounting* examines how accountants and non-accounting managers construct their company's earnings. Addressing issues in both internal management accounting such as budgeting, performance evaluation and control, as well as external financial accounting such as book-keeping, monthly/year-end accounts and auditing, David Leung focuses on how people classify transactions, make professional judgments and use computer software for accounting and prepare for and facilitate the auditing process. He also looks at accountancy training and the impact of people's affiliations to the accounting profession or other professions on their accounting and on their perceptions of financial statements. Other contingent or contextual factors that influence the choice of accounting method such as time pressure, reward structures, management authority and institutions are also considered. David Leung's research employs an innovative blend of theory and practice that redresses the imbalance between ethnographic studies of financial accounting and management accounting and helps close the gap between the academic curriculum and the experiences of practitioners. His research leads the author to conclude that no act of accounting classification is ever indefeasibly correct; that the accounting community's institutions and authority are central to the accounting process and to the truth and fairness of accounting numbers; that accounting training involves extensive use of learning by doing; and that both accountants and non-accounting managers have goals and interests that often result in no better than good enough accounting. This book will

Effects and Implications of Kazakhstan's Adoption of International Financial Reporting Standards Oksana Kim,2017-02-21 Despite having an underdeveloped supporting infrastructure and limited resources Kazakhstan was the first CIS country to require international financial reporting standards in 2004 for banks and in 2005 for all public companies What were the economic consequences of this important reform In the 1990s Kazakhstan s capital market reforms mirrored those of Russia due to the two countries cooperating mode driven by a high level of resource interdependence and environmental uncertainty following the collapse of the Soviet Union Yet by 2003 dependence on external donors the IMF World Bank took precedence over interdependence with Russia As a result Kazakhstan unilaterally proceeded with adoption of IFRS while Russia backed up from this initiative This study reports that Kazakhstan s inflow of foreign direct investments was the greatest among the CIS nations following the adoption of IFRS In addition in 2005 11 Kazakhstani public firms reporting quality was higher than that of the Russian public firms operating in a similar environment but exempt from the IFRS reporting requirement Kazakhstan was the first CIS nation to repay its external debt ahead of schedule and to receive an investment grade from Moody s rating agency The book concludes that Western style capital market reforms in this emerging market with a not so distant communist past had significantly positive outcomes
