M.I.S. V. Thomas Dock,Vincent P. Luchsinger,William R. Cornette,1977 *Academic Entrepreneurship and Technological Innovation: A Business Management Perspective* Szopa, Anna,Karwowski, Waldemar,Ordóñez de Pablos, Patricia,2012-09-30 In the ever changing scientific word Academic entrepreneurship has emerged as a new and growing field Referring to the creation and management of an environment for active support of knowledge exploitation and transfer Academic entrepreneurship aims to encourage entrepreneurial behavior in the academic community Academic Entrepreneurship and Technological Innovation A Business Management Perspective provides a wide ranging overview of the relationship between universities and organizations through the most recent and detailed research on university entrepreneurship This book aims to be a reference source for students researchers and practitioners interested in the academic industry s demand for technological innovation **Management Information Systems** Uma G. Gupta,1996

Information Systems Success Measurement Edward J. Garrity,G. Lawrence Sanders,1998-01-01 Information Systems Success Measurement focuses on insights and developments related to system success including comparisons of system success instruments validation of system success measures and new and improved measures of systems success It presents a wide range of important areas within the information systems success research agenda This book will provide researchers and professionals with a comprehensive reference for understanding and measuring systems success in modern organizations throughout the world *Management Information Systems* Uma Gupta,1996-01-01 Software Maintenance - A Management Perspective Phaneendra Nath Vellanky,2007-10-23 Computer systems play an important role in our society Software drives those systems Massive investments of time and resources are made in developing and implementing these

systems Maintenance is inevitable It is hard and costly Considerable resources are required to keep the systems active and dependable We cannot maintain software unless maintainability characters are built into the products and processes There is an urgent need to reinforce software development practices based on quality and reliability principles Though maintenance is a mini development lifecycle it has its own problems Maintenance issues need corresponding tools and techniques to address them Software professionals are key players in maintenance While development is an art and science maintenance is a craft We need to develop maintenance personnel to master this craft Technology impact is very high in systems world today We can no longer conduct business in the way we did before That calls for reengineering systems and software Even reengineered software needs maintenance soon after its implementation We have to take business knowledge procedures and data into the newly reengineered world Software maintenance people can play an important role in this migration process Software technology is moving into global and distributed networking environments Client server systems and object orientation are on their way Massively parallel processing systems and networking resources are changing database services into corporate data warehouses Software engineering environments rapid application development tools are changing the way we used to develop and maintain software Software maintenance is moving from code maintenance to design maintenance even onto specification maintenance Modifications today are made at specification level regenerating the software components testing and integrating them with the system Eventually software maintenance has to manage the evolution and evolutionary characteristics of software systems Software professionals have to maintain not only the software but the momentum of change in systems and software In this study we observe various issues tools and techniques and the emerging trends in software technology with particular reference to maintenance We are not searching for specific solutions We are identifying issues and finding ways to manage them live with them and control their negative impact

Managerial Perspective Gupta,1996-01-01

Management Intelligent Systems Jorge Casillas,Francisco J. Martínez-López,Juan Manuel Corchado Rodríguez,2012-07-11 The 2012 International Symposium on Management Intelligent Systems is believed to be the first international forum to present and discuss original rigorous and significant contributions on Artificial Intelligence based AI solutions with a strong practical logic and preferably with empirical applications developed to aid the management of organizations in multiple areas activities processes and problem solving i e what we propose to be named as Management Intelligent Systems MiS The three day event aimed to bring together researchers interested in this promising interdisciplinary field who came from areas as varied as management marketing and business in general computer science artificial intelligence statistics etc This volume presents the proceedings of these activities in a collection of contributions with many original approaches They address diverse Management and Business areas of application such as decision support segmentation of markets CRM product design service personalization organizational design e commerce credit scoring workplace integration innovation management business database analysis workflow management location of stores etc A

wide variety of AI techniques have been applied to these areas such as multi objective optimization and evolutionary algorithms classification algorithms ant algorithms fuzzy rule based systems intelligent agents Web mining neural networks Bayesian models data warehousing rough sets etc The symposium was organized by the Soft Computing and Intelligent Information Systems Research Group <http://sci2s.ugr.es> of the University of Granada Spain and the Bioinformatics Intelligent System and Educational Technology Research Group <http://bisite.usal.es> of the University of Salamanca Spain The present edition is held in Salamanca Spain on July 11-13 2012

Decision Modelling and Information Systems Nikitas-Spiros Koutsoukis, Gautam Mitra, 2012-12-06 In *Decision Modelling And Information Systems* The Information Value Chain the authors explain the interrelationships between the decision support decision modelling and information systems The first two parts of the book focus on the interdisciplinary decision support framework in which mathematical programming optimization is taken as the inference engine The role of business analytics and its relationship with recent developments in organisational theory decision modelling information systems and information technology are considered in depth Part three of the book includes a carefully chosen selection of invited contributions from internationally known researchers These contributions are thought provoking and cover key decision modelling and information systems issues The final part of the book covers contemporary developments in the related area of business intelligence considered within an organizational context The topics cover computing delivered across the web management decision making and socio economic challenges that lie ahead It is now well accepted that globalisation and the impact of digital economy are profound and the role of e business and the delivery of decision models business analytics across the net lead to a challenging business environment In this dynamic setting decision support is one of the few interdisciplinary frameworks that can be rapidly adopted and deployed to so that businesses can survive and prosper by meeting these new challenges
