Pref *South Coast New Guinea Cultures* Bruce M. Knauff, 1993-03-25 The communities of south coast New Guinea were the subject of classic ethnographies and fresh studies in recent decades have put these rich and complex cultures at the centre of anthropological debates Flamboyant sexual practices such as ritual homosexuality have attracted particular interest In the first general book on the region Dr Knauff reaches striking new comparative conclusions through a careful ethnographic analysis of sexuality the status of women ritual and cosmology political economy and violence among the region's seven major language culture areas The findings suggest new Melanesian regional contrasts and provide for a general critique of the way regional comparisons are constructed in anthropology Theories of practice and political economy as well as post modern insights are drawn upon to provide a generative theory of indigenous social and symbolic development

*Supernatural Selection* Matt Rossano, 2010-05-28 In 2006 scientist Richard Dawkins published a blockbuster bestseller *The God Delusion* This atheist manifesto sparked a furious reaction from believers who have responded with numerous books of their own By pitting science against religion however this debate

overlooks what science can tell us about religion According to evolutionary psychologist Matt J Rossano what science reveals is that religion made us human In *Supernatural Selection* Rossano presents an evolutionary history of religion Neither an apologist for religion nor a religion basher he draws together evidence from a wide range of disciplines to show the valuable even essential adaptive purpose served by systematic belief in the supernatural The roots of religion stretch as far back as half a million years when our ancestors developed the motor control to engage in social rituals that is to sing and dance together Then about 70 000 years ago a global ecological crisis drove humanity to the edge of extinction It forced the survivors to create new strategies for survival and religious rituals were foremost among them Fundamentally Rossano writes religion is a way for humans to relate to each other and the world around them and in the grim struggles of prehistory it offered significant survival and reproductive advantages It emerged as our ancestors first health care system and a critical part of that health care system was social support Religious groups tended to be far more cohesive which gave them a competitive advantage over non religious groups and enabled them to conquer the globe Rather than focusing on one aspect of religion as many theorists do Rossano offers an all encompassing approach that is rich with surprises insights and provocative conclusions
