Slang outlines the context behind the slang used by members of the United States Armed Forces during the Vietnam War. Troops facing and inflicting death display a high degree of linguistic creativity. Vietnam was the last American war fought by an army with conscripts and their involuntary participation in the war added a dimension to the language. War has always been an incubator for slang; it is brutal and brutality demands a vocabulary to describe what we don't encounter in peacetime civilian life. Furthermore, such language serves to create an intense bond between comrades in the armed forces, helping them to support the heavy burdens of war. The troops in Vietnam faced the usual demands of war as well as several that were unique to Vietnam: a murky political basis for the war, widespread corruption in the ruling government, untraditional guerilla warfare, an unpredictable civilian population in Vietnam, and a growing lack of popular support for the war back in the US. For all these reasons, the language of those who fought in Vietnam was a vivid reflection of life in wartime Vietnam. *Vietnam War Slang* lays out the definitive record of the lexicon of Americans who fought in the Vietnam War. Assuming no prior knowledge, it presents around 2000 headwords, with each entry divided into sections giving parts of speech, definitions, glosses, the countries of origin, dates of earliest known citations, and citations. It will be an essential resource for Vietnam veterans and their families, students, and readers of history and anyone interested in the principles underpinning the development of slang.

Consuming Urban Culture in Contemporary Vietnam Lisa Drummond, Mandy Thomas, 2005-07-25 Vietnam is currently undergoing a metamorphosis from a relatively closed society with a centrally planned economy to a rapidly urbanising one with a global outlook These changes have been the catalyst for an exciting ferment of activity in popular culture This volume contains contributions from scholars engaged in the most up to date social research in Vietnam as well as some of Vietnam s most popular cultural producers who are forging new ways of imagining the present whilst at the same time engaging actively in reinterpreting the past The diverse ways that Vietnam is culturally and socially negotiating the future are examined as the book addresses issues of indigenisation of cultural influences ambivalence surrounding change and the consistent blurring of boundaries between informal non state cultural activities and formal

institutional structures in the evolution of a civil society in Vietnam **Beer in East Asia** Paul Chambers, Nithi Nuangjamnong, 2023-03-17 Chambers Nuangjamnong and their contributors look at how the development of the beer industry in East Asia presents a unique opportunity for understanding the region's political economy. Asia is both the world's largest beer consuming and beer producing region and the fastest growing beer market. Per capita consumption is lower than Europe but catching up fast. Beer consumption is also widely understood to correlate closely with economic growth and urbanization much more so than other alcoholic beverages like spirits. With ten country case studies from both Northeast and Southeast Asia, the contributors to this volume look at the history of beer production and consumption across East Asia through a lens of historical institutionalism and political economy. In doing so, they not only examine the development of the beer industry in the region but also what it tells us about the countries themselves. They ask questions such as: To what extent have state versus societal actors influenced the path of beer production? How has beer production changed? Was there a critical juncture at which beer production abruptly changed course? A valuable resource for students and scholars of modern East Asian History and particularly those with a focus on colonial history, industrial history and state-society relations.
