In his second book, Zoltan J. Kiss brings his original research on the energy balance of relativity to a revolutionary conclusion. He proves that the quantum energy impact of the Earth provides mankind with an energy surplus, a gift for us to use. His book is exciting reading even for non-physicists. The quantum energy-based explanations grant the book a specific value. Reading the book, you will be participating in discussions among many others on the quantum energy and mass balance of the atomic structure of elements, the magnet, the speed of light, the plasma, the nature of water and fire, and on electric hydrocarbon and nuclear engines. The author's relativistic quantum approach is fascinating. Proofs have been provided through mathematics but also supplemented with practical examples. Zoltan J. Kiss successfully achieves his aim. He shows that we have a potential new energy source to exploit. This is the quantum energy impact of the motion of the Earth.
