Introduction to Stellar Astrophysics: Volume 1, Basic Stellar Observations and Data Erika

Böhm-Vitense,1989-08-25 This textbook introduction to the basic elements of fundamental astronomy and astrophysics serves as a foundation for understanding the structure evolution and observed properties of stars The first half of the book explains how stellar motions distances luminosities colors radii masses and temperatures are measured or derived The author then shows how data of these sorts can be arranged to classify stars through their spectra Stellar rotation and stellar magnetic fields are introduced Stars with peculiar spectra and pulsating stars also merit special attention The endpoints of stellar evolutions are briefly described There is a separate chapter on the Sun and a final one on interstellar absorption The usefulness of this text is enhanced by the inclusion of problems for students tables of astronomical constants and a selective bibliography This is an excellent textbook for undergraduate and beginning graduate students studying astronomy and astrophysics

NBS Technical Note ,1970 *Boron Rich Solids* Nina Orlovskaya,Mykola Lugovy,2010-10-07 The objective of this book is to discuss the current status of research and development of boron rich solids as sensors ultra high temperature ceramics thermoelectrics and armor Novel biological and chemical sensors made of stiff and light weight boron rich solids are very exciting and efficient for applications in medical diagnoses environmental surveillance and the detection of pathogen and biological chemical terrorism agents Ultra high temperature ceramic composites exhibit excellent oxidation and corrosion resistance for hypersonic vehicle applications Boron rich solids are also promising candidates for high temperature thermoelectric conversion Armor is another very important application of boron rich solids since most of them exhibit very high hardness which makes them perfect candidates with high resistance to ballistic impact The following topical areas are presented Boron rich solids science and technology Synthesis and sintering strategies of boron rich solids Microcantilever sensors Screening of the possible boron based thermoelectric conversion materials Ultra high temperature ZrB₂ and HfB₂ based composites Magnetic transport and high pressure properties of boron rich solids Restrictions of the sensor dimensions for chemical detection Armor

An Introduction to Spectroscopic Methods for the Identification of Organic Compounds F. Scheinmann,2013-10-22 An Introduction to Spectroscopic Methods for the Identification of Organic Compounds Volume 2 covers the theoretical aspects and some applications of certain spectroscopic methods for organic compound identification This book is composed of 10 chapters and begins with an introduction to the structure determination from mass spectra The subsequent chapter presents some mass spectrometry seminar problems and answers This presentation is followed by discussions on the problems concerning the application of UV spectroscopy and electron spin resonance spectroscopy Other chapters deal with some advances and development in NMR spectroscopy and the elucidation of structural formula of organic compounds by a combination of spectral methods The final chapter surveys seminar problems and answers in the identification of organic compounds using NMR IR UV and mass spectroscopy This book will
