Theoretical Nursing

Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the

tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher Nursing Theories Julia B. George,1995 Designed as a tool to help nurses apply nursing concepts and theories to actual nursing practice this book considers the ideas of well known nursing theorists and relates the work of each to the nursing process of assessing diagnosing planning implementing and evaluating Chapters include interpretation and discussion of each component and applies these in nursing situations Advanced nursing students **Nursing Theories in Practice** Marilyn E.
