political socio legal and cultural processes that underpinned the social construction of negligence at this time The result is a clearly enunciated description of what negligence meant to the Victorians and how they sought to define and deal with negligent care moving the topic from the sidelines of English welfare history to the centre stage role it played in Victorian society Thematically and chronologically arranged in two parts the book uses extensive new archival material with a particular focus on the official inquiries into neglect conducted by poor law inspectors It offers a fresh perspective on the poor laws that has repercussions for wider histories of welfare medicine and legal medicine *The Impact of Hospitals, 300-2000* John Henderson, Peregrine Horden, Alessandro Pastore, 2007 The first wide ranging collection of articles on the history of hospitals in the Mediterranean northern Europe and the Americas for over 17 years The contributions present a nuanced approach to the impact of hospitals on society over a very long time period and an exceptional geographical range

Mothers, Midwives, and Reproductive Labor in Interwar and Wartime Britain, Sandra Trudgen Dawson, 2024-01-26 Mothers Midwives and Reproductive Labor in Interwar and Wartime Britain is about the experiences of mothers and midwives as they navigated the changing political and social issues surrounding childbirth and motherhood during interwar and wartime Britain The needs and agency of women as mothers and midwives often conflicted with the ideals of the state While government officials understood the importance of safe childbirth to the nation they also chose to allow economic crises and war preparation to take precedence The interwar plans for a national maternal healthcare system met financial constraints and a lack of political will As the outbreak of the Second World War appeared imminent politicians planned for pregnant women and those with small children to evacuate from cities The reception areas were less well planned and pregnant women returned to their homes rather than deliver among strangers Wartime maternity provision didn't take into account the needs and desires of mothers and midwives Reproductive laborers mothers and midwives demonstrated agency throughout the period Pregnant women chose to deliver at home with untrained or trained birth attendants midwives entered and left the profession on their own terms offering or

Gender in Scottish History Since 1700 Lynn Abrams, 2006-01-25 Scottish history is undergoing a renaissance Everyone agrees that an understanding of our nation's history is integral to our experience of its present and the shaping of the future But the story of Scotland's past is being told with little reference to gendered identities Not only are women largely missing from these grand narratives but men's experience has tended to be sublimated in intellectual political and economic agendas Neither femininities nor masculinities have been given much of a place in Scotland's past or in the process of nation making Gender in Scottish History offers a new perspective on Scotland's past since around 1700 viewing some of the main themes with a gendered perspective It starts from the assumption that gender is integral to our understanding of the ways in which societies in the past were organised and that national histories have a tendency to be gender blind Each chapter engages with one key theme from Scottish historiography asking what happens when women are added to the story and how the story changes when the meanings of gendered understandings and assumptions are probed Addressing politics culture religion science education work the family and identity Gender in Scottish History proposes an alternative reading of the Scottish past which is both inclusive and recognisable

William Beinart, Marcelle C. Dawson, 2010-12-01 An examination of post apartheid politics This volume explores some of the key features of popular politics and resistance before and after 1994 It looks at continuities and changes in the forms of struggle and ideologies involved as well as the significance of post apartheid grassroots politics Is this a new form of politics or does it stand as a direct descendent of the insurrectionary impulses of the late apartheid era Posing questions about continuity and change before and after 1994 raises key issues concerning the nature of power and poverty in the country Contributors suggest that expressions of popular politics are deeply set within South African political culture and still have the capacity to influence political outcomes The introduction by William Beinart links the papers together places them in context of recent literature on popular politics and history from below and summarises their main findings supporting the argument that popular politics outside of the party system remain significant in South Africa and help influence national politics The roots of this collection lie in post graduate student research conducted at the University of Oxford in the early twenty first century **Maneuvers** Cynthia Enloe, 2000-02 Enloe outlines the dilemmas feminists around the globe face in trying to craft theories and strategies that support militarized women locally and internationally without unwittingly being militarized themselves

Fever Hospitals and Fever Nurses Margaret Currie, 2013-01-11 This well researched book provides an interesting study of the development of fever hospitals and fever nursing mainly in nineteenth and twentieth century Britain It provides new insights into the development of nursing roles and nurse education and looks at the lives of key figures at that time The text examines how this once important branch of the nursing profession emerged in the nineteenth century only to be discarded in the second half of the following century Drawing on the work of Goffman and Foucault the study shows how aided by medical advances fever nurses transformed their custodial duties into a therapeutic role and how training schemes were implemented to improve the recruitment and retention of nurses As standards of living improved and patient s chances of recovery increased many fever hospitals became redundant and fever nurses were no longer required The wisdom of creating fever hospitals and then disbanding them is questioned in the light of changing disease patterns international travel and the threat posed by biological warfare Policy & Politics in Nursing and Health
