Integrated Nutrient Management for Sustainable Crop Production

*Pre-publication
REVIEWS,
COMMENTARIES,
EVALUATIONS . . .*

“Provides a comprehensive description of efficient nutrient management practices used in diverse cropping systems throughout the world. For each major cropping region, leading international scientists thoroughly discuss nutrient use and management for the major crops and cropping systems, while concisely identifying future research needs and education priorities. Students and professionals interested in the global view of nutrient management technologies essential to world food security and protecting our natural resources will find this an invaluable resource.”

Dr. John Haylin, Professor
*Department of Soil Science,
North Carolina State University, Raleigh*

“The authors have well illustrated the critical importance of integrated nutrient management in meeting crop production and food security needs while maintaining environmental sustainability under a range of environments, agricultural systems, and societal and economic conditions. This will be a valuable desk reference and resource for students and professionals as a compendium to integrated nutrient management approaches that are uniquely applied over a range of geographic, social, and environmental conditions that influence the availability, effectiveness, and environmental consequences of fertilizers, plant and animal manures, soil organic resources, and biological fixed N for crop production.”
