Nutrition Alcoholism:

Molecular Aspects of Alcohol and Nutrition Vinood B. Patel, 2015-11-06 *Molecular Aspects of Alcohol and Nutrition* is a valuable resource for nutrition researchers and nutritionists who study or treat alcohol related diseases. Experts from across the field of alcohol research explain how alcohol disrupts normal fat, carbohydrate, and protein metabolic processes occurring in the liver as well as other parts of the body. The book discusses how this can lead to alcoholic liver disease (ALD) as well as contribute to the onset of Type 2 diabetes and the metabolic syndrome. It also explores how alcohol affects nutrient absorption in the gastrointestinal tract and can lead to anemia and reduced amounts of fat soluble vitamins. This book explores both the primary and secondary consequences of alcohol consumption. Chapters in the first section investigate the basic science of alcohol metabolism, focusing on how alcohol and its toxic metabolites disrupt and impair normal nutrient regulation at the molecular level. Further chapters explore how alcohol affects many extra-hepatic organs and tissues as well as the secondary consequences of alcohol consumption such as reduced levels of minerals like magnesium, calcium, and trace elements like zinc. Offers a valuable resource for nutrition researchers and nutritionists who study alcohol related diseases and attempt to treat them through nutritional strategies. Explores how alcohol and its toxic metabolite, acetaldehyde, disrupt and impair normal macro and micro nutrient regulation at the molecular level. Investigates how alcohol affects and interferes with cell signaling, cell death pathways, calcium homeostasis, leading to osteoporosis, oxygen balance, as well as the pathophysiology of alcohol consumption and abuse. Nutrition and Alcohol the CRC Series in Physiology of Drug Abuse Ronald Ross Watson, Bernhard Watzl, 1992-09-03 *Nutrition and Alcohol* provides a comprehensive summary of the latest research data available on the effects of alcohol on the nutritional state of alcohol abusers. Data illustrating the combined effects of direct alcohol toxicity together with the ill effects of malnutrition on tissue damage are emphasized. The book is oriented toward clinicians and basic scientist researchers. A question often raised is: In what way does an alcoholic alcohol? In nature, the fermentation of sugars is the difference from a nonalcoholic.
