**WHEREAS**, emergencies and disasters disrupt the lives of populations affected, putting them at risk of developing various undesirable health and related conditions, including those that threaten the nutritional status of individuals especially the most vulnerable groups: infants, children, adolescents, pregnant women and breastfeeding mothers, older persons, persons with disabilities, people living with debilitating conditions, and indigenous peoples;

**WHEREAS**, the risk of deterioration in the nutritional status of the population likewise limits the achievement of the Philippine Plan of Action for Nutrition (PPAN) targets, Sustainable Development Goal (SDG) No. 2 (Zero Hunger) and other related SDGs;

**WHEREAS**, such a threat could be mitigated through the delivery of various nutrition-specific and nutrition-sensitive interventions, as well as related interventions, which are best identified and implemented through processes that allow the maximum participation of those affected;

**WHEREAS**, the delivery of quality nutrition-specific and related interventions could be facilitated through clear and practical quality standards;

**WHEREAS**, on 03 December 2009, the NNC Governing Board approved the Resolution No. 1 adopting the National Policy on Nutrition Management in Emergencies and Disasters;

**WHEREAS**, since the policy was adopted, the country has been adversely affected by emergencies, disasters, and worsening impacts of climate change, specifically, Typhoons Ondoy (2009), Sendong (2010), Pablo (2011), Yolanda (2013) and Odette (2021); Zamboanga Siege (2013); Bohol Earthquake (2013); Marawi City Siege (2017); Taal Volcano Eruption (2020); and the COVID-19 Pandemic (2020), through which more lessons have been learned along nutrition management in emergencies;

**WHEREAS**, the disaster risk reduction and management system in the Philippines has evolved significantly, which included the adoption of the National Disaster Response Plan that lays out the response protocols of all response clusters and the designation of National Nutrition Council as the Chair of the National Nutrition Cluster, a sub-cluster under the Health Quad Cluster, chaired by the Department of Health;

**WHEREAS**, in April 2018, the NNC Governing Board approved the Resolution No. 2 adopting the Strategic Plan on Nutrition in Emergencies (NIE) for 2017-2022;

Mostofsky, Jacob Lomranz, 2013-11-11 From time to time professional journals and edited volumes devote some of their pages to considerations of pain and aging as they occur among the aged in different cultures and populations One starts from several reasonable assumptions among them that aging per se is not a disease process yet the risk and frequency of disease

processes increase with ongoing years The physical body's functioning and ability to restore all forms of damage and insult slow down the immune system becomes compromised and the slow growing pathologies reach their critical mass in the later years The psychological body also becomes weaker with unfulfilled promises and expectations and with tragedies that visit individuals and families and the prospect that whatever worlds remain to be conquered will most certainly not be met with success in the rapidly passing days and years that can only culminate in death Despair and depression coupled with infirmity and sensory and or motor inefficiency aggravate both the threshold and the tolerance for discomfort and synergistically collaborate to perpetuate a vicious cycle in which the one may mask the other Although the clinician is armed with the latest advances in medicine and pharmacology significant improvement continues to elude her or him The geriatric specialist all too familiar with such realities usually can offer little else than a hortative to learn to live with it but the powers and effectiveness of learning itself have declined
