Organosulfur Antioxidants in Hydrocarbon Oils D. N. Harpp, J. Robertson, 1985 **Fuels and Lubricants Handbook**, **The Significance of Tests for Petroleum Products**, 1951 *Lubricant Additives* Leslie R. Rudnick, 2009-04-20 Cost environmental and performance issues coupled with legislative changes new engine oil requirements and technology development for exploration of space and the oceans are changing the lubrication additive market Reflecting how the need for new applications drives the development of new lubricant additives *Lubricant Additives Chemistry and Applications* Second Edition presents methods to Improve the performance efficiency and stability of lubricants Protect metal surfaces from wear Select lubricant additives for the food processing industry Select the most appropriate ashless additives Avoid microbial degradation of lubricants Lower toxicity And describes Standard lubricant testing methods and product specifications Mechanisms and benefits of specific types of lubricant additives Recent industry trends Up to Date Coverage of Lubricant Additive Chemistry and Technology Addressing new trends in various industrial sectors and improvements in technology this second edition provides detailed reviews of additives used in lubricant formulations their chemistry mechanisms of action and trends for major areas of application It explores the design of cost effective environmentally friendly lubricant technologies and lubricants for automotive industrial manufacturing aerospace and food processing applications An extensive list of online industry resources is available for download at crcpress.com

Surface Activity of Petroleum Derived Lubricants Lilianna Z. Pillon, 2016-04-19 Hundreds of lubricant additives are available industry wide to improve base stock properties and protect metal surfaces however the wrong combination of these commodities can result in substandard performance *Surface Activity of Petroleum Derived Lubricants* explains how surface activity is affected by several factors the interfacial properties *Handbook of Industrial Hydrocarbon Processes* James G. Speight, 2019-11-21 *Handbook of Industrial Hydrocarbon Processes* Second Edition provides an analysis of the process steps required to produce hydrocarbons from various raw materials and how the choice of a process depends not only on technology but also on external effects such as social and economic developments political factors affecting the availability of raw materials and environmental legislation This book qualitatively examines chemical processes and plant design by showing the factors determining process structures including the underlying chemistry feedstock product specifications and reactor design The book also compares the processes for different products based on raw materials and manufacturing processes based on their respective applications With the addition of useful flowcharts that present an overview of the chemical processes process design and equipment this book is a valuable resource to industry professionals on how to understand how hydrocarbons are produced from different raw materials and how to develop an instinct for the right process development strategy Provides a qualitative analysis of chemical processes and plant design by showing the factors determining process structures Presents chemical processes in an organized easy to read and understandable manner with

the use of useful flowcharts and concise descriptions Includes updates on changes in existing technological and chemical processes as well as possible future improvements or changes to other more economic or more readily available feedstocks

Refining Used Lubricating Oils James Speight,Douglas I. Exall,2014-04-07 Used lubricating oil is a valuable resource This book examines recycling processes for a range of products with different properties and different criteria It also compares the various recycling methods and resulting products to conventional products obtained from original refining processes The reviews data and comparisons provided by the authors allow readers to identify which processes are likely to produce a product with specific properties and enable them to combine this with an analysis of the economic data to identify attractive oil recycling propositions

Oxidation in Foods and Beverages and Antioxidant Applications Eric A Decker,Ryan J Elias,D. Julian McClements,2010-09-27 Oxidative rancidity is a major cause of food quality deterioration leading to the formation of undesirable off flavours as well as unhealthful compounds Antioxidants are widely employed to inhibit oxidation and with current consumer concerns about synthetic additives and natural antioxidants are of much interest The two volumes of Oxidation in foods and beverages and antioxidant applications review food quality deterioration due to oxidation and methods for its control The first volume focuses on oxidation mechanisms and antioxidant activity Initial chapters in part one describe oxidation processes in foods including the role of metals heme proteins and lipoxygenase The impact of oxidation on food flavour and the health aspects of oxidized fats are also covered Final chapters in part one review the measurement of the extent of lipid oxidation and methods for food shelf life determination Part two discusses the ways in which antioxidants inhibit food oxidation factors affecting antioxidant efficacy methods to measure antioxidant activity and novel antioxidants With its distinguished international team of editors and contributors the two volumes of Oxidation in foods and beverages and antioxidant applications is standard references for R D and QA professionals in the food industry as well as academic researchers interested in food quality Describes oxidation processes in foods including the role of metals heme proteins and lipoxygenase Reviews the impact of oxidation on food flavour and the health aspects of oxidized fats Discusses the ways in which antioxidants inhibit food oxidation factors affecting antioxidant efficacy and methods to measure antioxidant activity
