Origin, of Cultivated Plants (Classic Reprint) Alphonse de Candolle, 2015-07-06

Excerpt from *Origin of Cultivated Plants*

The knowledge of the origin of cultivated plants is interesting to agriculturists to botanists and even to historians and philosophers concerned with the dawnings of civilization I went into this question of origin in a chapter in my work on geographical botany but the book has become scarce and moreover since 1855 important facts have been discovered by travellers botanists and archaeologists Instead of publishing a second edition I have drawn up an entirely new and more extended work which treats of the origin of almost double the number of species belonging to the tropics and the temperate zones It includes almost all plants which are cultivated either on a large scale for economic purposes or in orchards and kitchen gardens I have always aimed at discovering the condition and the habitat of each species before it was cultivated
