A New Science of Heaven Robert Temple, 2022-03-24 This book is an important contribution and I hope it will open many minds What is particularly important in it are the discussions of David Bohm of bioplasma biophotons and bioelectronics PROFESSOR ZBIGNIEW WOLKOWSKI Sorbonne University Paris Answers so many questions scientific and esoteric about the true nature of our reality A seminal work Will revolutionise how we frame reality and the thinking of everyone on this planet Kudos to Professor Temple for striking the first match to light the fire

NEW DAWN The story of the science of plasma and its revolutionary implications for the way we understand the universe and our place in it Histories of science in the 20th century have focused on relativity and quantum mechanics But quietly in the background there has been a third area of exploration which has equally important implications for our understanding of the universe It is unknown to the general public despite the fact that many Nobel prize winners senior academics and major research centres around the world have been devoted to it it is the study of plasma Plasma is the fourth state of matter and the other three gas liquid and solids emerge out of plasma This book will reveal how over 99% of the universe is made of plasma and how there are two gigantic clouds of plasma called the Kordylewski Clouds hovering between the Earth and the Moon only recently discovered by astronomers in Hungary Other revelations not previously known outside narrow academic disciplines include the evidence that in certain circumstances plasma exhibits features that suggest they may be in some sense alive clouds of plasma have evolved double helixes banks of cells and crystals filaments and junctions which could control the flow of electric currents thus generating an intelligence similar to machine intelligence We may in fact have been looking for signs of extra terrestrial life in the wrong place Bestselling author Robert Temple has been following the study of plasma for decades and was personally acquainted with several of the senior scientists including Nobel laureates at its forefront including Paul Dirac David Bohm Peter Mitchell and Chandra Wickramasinghe who has co written an academic paper with Temple

THE TRUTH OF THE ORIGIN OF THE UNIVERSE Sabrie Soloman, 2024-06-12 In a world filled with scientific explanations and theories it can be easy to lose sight of the ultimate truth of our existence The truth is that the universe with all its intricate complexities did not come into being by mere chance or a random explosion It was carefully designed and orchestrated by a higher power a Creator who holds everything together When we look up at the night sky and see the countless stars and galaxies stretching out into infinity we cannot help but be in awe of the sheer magnitude and

beauty of it all The heavens declare the glory of God as it says in the Bible and remind us of the greatness of the one who made it all The theory of the Big Bang which posits that the universe began as a singular point and expanded over billions of years is a flawed explanation for the origin of the universe It fails to account for the intricate design and order that we see in the cosmos as well as the existence of life on earth The marvel of our planet Earth with its perfect conditions for sustaining life points to a Creator who had a purpose and a plan in mind when he made it The countless galaxies and stars that we observe in the universe are a testament to the power and creativity of God They show us that we are part of a vast and wondrous creation one that was made by an intelligent designer who had a vision for it all The theory of evolution put forth by Charles Darwin is another flawed explanation for the diversity of life on earth It fails to explain the intricate complexities of living organisms and their unique design as well as the existence of the human soul It is clear that we are not the product of blind chance or random mutations but rather the handiwork of a loving and powerful Creator The truth of the origin of the universe points to a Creator who holds everything together and has a purpose and a plan for it all God stretches out the heavens and allows light to reach us here on earth showing us his care and provision for his creation We are not the product of random chance or blind evolution but rather the cherished creation of a loving God who made us in his image Let us never forget the marvel and wonder of the universe and the greatness of the one who made it all
