Population Development In Rural Egypt:

Population and Development in Rural Egypt Allen C. Kelley, Atef M. Khalifa, M. Nabil El-Khorazaty, 1982 **The Demographic Revolution in Modern Egypt** Warren C. Robinson, Fatma H. El-Zanaty, 2006-01-01 The Demographic Revolution in Modern Egypt tells the dramatic story of Egypt's transition in the last two decades from staggeringly high to low fertility and mortality rates. Scholars Warren C. Robinson and Fatma H. El-Zanaty especially delve into the reasons for the decline in fertility, including the relative success of Egypt's recent public initiatives in family planning. Robinson and El-Zanaty compellingly show the importance of continued demographic stability in Egypt for that nation, the Middle East, and indeed the world. The authors point to Egypt's optimistic progress as a model for other countries facing out-of-control birthrates wreaking havoc with economic and social development.

Egypt's Agricultural Development, 1800-1980 Alan Richards, 2019-04-18 This book uses both microeconomic theory and social and political analysis to show how the interaction of social classes, technical change, government policy, and the international and state systems have shaped Egypt's agricultural development.
Administration and Development in the Arab World Jamil Jreisat, Zaki R. Ghosheh, 2016-03-22 This book, first published in 1986, examines the literature on administration, human resources, and development in the Arab world. It emphasizes contemporary societies and their internal dynamics, the least known and most critical aspects of Arabic studies.
Population Dilemmas in the Middle East Gad G. Gilbar, 2012-11-12 This study provides a general outline of Palestinian population growth between 1948 and 1987 and then focuses on the town of Nablus for a detailed analysis of the main aspects of Palestinian migration and high rates of natural increase. The author shows how the recession that struck the Arab oil economies in the early 1980s, by slowing down the migratory movement, shut off the valve that had afforded the Palestinians in the West Bank and Gaza relief from economic pressures.

The Adaptation Process of a Resettled Community to the Newly-Built Environment: A Study of the Nubian Experience in Egypt Wael Salah Fahmi, 2014-04-01 Generally, construction of dams is regarded as a means of economic progress in many countries. Major consequences of such projects are the inundation of upstream areas and the resettlement of entire communities in newly built environments where they experience dramatic transformation in their lifestyles. The present study takes the Nubian resettlement experience after the creation of Lake Nasser that submerged their old settlements along the river Nile. Following their resettlement, the design of the newly built environment disrupted the Nubian traditional lifestyles and patterns of privacy, mechanisms of territoriality, and social interaction. The inadequacy of the newly built environment was mainly attributed to the Nubians' transfer from spacious homes in the old villages to compact, contiguous houses in the new settlements. The arrangement of these resettlement state-built houses, distributed on the basis of household size, has further resulted in the fragmentation and the dispersion of traditional kinship-based neighborhoods. Within an interdisciplinary approach, the study is based on theoretical, historical, and conceptual themes and on empirical

research It sets out to examine the households responses towards and adaptation mechanisms with the newly built environment looking critically at the achievements of imposed top down planning in meeting the socio cultural and economic needs of those resettled

Perspectives on Development and Population Growth in the Third World O.G. Simmons,2012-12-06 Until the early to mid 1970s social scientists in the fields of population and development were largely going their own ways Demographers relied almost exclusively on demographic transition theory as their para digm for understanding the role of development in population change and fertility decline Conversely most development economists and other specialists were certainly aware of the constraints placed upon development objectives by population growth However the main de velopment theories paid little attention to population and the implica tions of population growth for development Indeed it was not until after the World Population Conference in Bucharest in 1974 that the interaction of population and development became a serious and pur posive theme for social scientific study Accordingly since about the mid 1970s an extensive literature in the field of population and develop ment has been generated And in 1975 under the auspices of The Popu lation Council the journal Population and Development Review was found ed a journal which in the past decade has developed into the premier publication in the world for work in this area But our understanding of development as it refers to change in Third World countries remained fragmented Moreover our understanding of the linkages and interac tions between population and development was very limited It is in this regard that Ozzie Simmons s Perspectives on Development and Population Growth in the Third World will certainly have an impact

The Egyptian Labor Market Caroline Krafft,Ragui Assaad,2022-03-03 The Egyptian economy has faced many challenges in the decade since the 2011 Arab Spring uprisings Not only was job creation anaemic from 2012 to 2018 but new jobs were also of low quality characterized by informality and vulnerability to economic shocks These challenges pushed many in Egypt especially the most vulnerable into a more precarious labor market situation Then in the midst of economic recovery brought on by tough reform measures adopted in 2016 and 2017 the country was hit by the widespread disruption of a global pandemic This book examines the plight of Egypt s most vulnerable groups by focusing on the intersection of gender and economic vulnerability in the labor market With this emphasis on vulnerability and a lens that is sensitive to gender differences and inequities the contributors to this volume use data from the most recent wave of a unique longitudinal survey to illuminate different aspects of Egyptians lives The aspects they explore include labor supply behavior the ability to access good quality and well paying jobs the evolution of wages and wage inequality the school to work transition of youth the decline in public sector

employment international and internal migration the situation of rural women access to social protection food security vulnerability to shocks and coping mechanisms health status and access to health care services These analyses are prescient in understanding the axes of vulnerability in Egyptian society that became all too salient during the COVID 19 pandemic

Community Development And Family Planning J. Mayone Stycos, 2019-03-22 Program evaluation is not among the most popular of exercises since it carries risks for all associated with it Because every important program has friends and enemies anxious for its prosperity or demise the investigators and their findings will normally be attacked from at least one side and not infrequently from both But this is an occupational hazard dutifully accepted by its practitioners for some it even adds a zestful touch of danger However the program's sponsors and its participants require an unusual degree of courage since negative or indifferent results are not infrequently used to impugn their wisdom or dedication We applaud the courage of all those who in the interest of improving policies and programs to further their clients well being assumed the risks of introducing scientific program evaluation Primary credit goes to the sponsor of the current research the United Nations Fund for Population Activities UNFPA in particular the Mediterranean and Middle East Branch and its chief Roushdi El Henedi Special thanks go to Dr Habib Siddiqui for his stimulus in launching the study His efforts were followed by those of M A Abu Nuwar whose bureaucratic and diplomatic skills were much appreciated and Sylvia Rhodes who was of assistance near the close of the project UNFPA staff in Egypt in particular Hamed Fahmy were most helpful in the field Needless to say neither these individuals nor the UNFPA necessarily agree with the conclusions reached in this book **In The U.S. Interest** Janet

Work-related Migration and Poverty Reduction in Nepal Michael Lokshin, Mikhail Bontch-Osmolovski, Elena E. Glinskaya, 2007 Using two rounds of nationally representative household survey data in this study the authors measure the impact on poverty in Nepal of local and international migration for work They apply an instrumental variable approach to

deal with nonrandom selection of migrants and simulate various scenarios for the different levels of work related migration comparing observed and counterfactual household expenditure distribution The results indicate that one fifth of the poverty reduction in Nepal occurring between 1995 and 2004 can be attributed to increased levels of work related migration and remittances sent home The authors also show that while the increase in work migration abroad was the leading cause of this poverty reduction internal migration also played an important role The findings show that strategies for economic growth and poverty reduction in Nepal should consider aspects of the dynamics of domestic and international migration **The**
