War II Ryan K. Noppen, Douglas C. Dildy, 2022-05-26 This fully illustrated study details Germany and Italy's failed development of World War II aircraft carriers and the naval aviation ships that the two Axis powers sent into action in their place The quest for a modern aircraft carrier was the ultimate symbol of the Axis powers challenge to Allied naval might but fully fledged carriers proved either too difficult expensive or politically unpopular for either to make operational After the Anglo German Naval Agreement of 1935 Hitler publicly stated his intention to build an aircraft carrier the Graf Zeppelin

which was launched in 1938 A year later the ambitious fleet expansion Z Plan was unveiled with two additional aircraft carriers earmarked for production However by the beginning of World War II Graf Zeppelin was not yet completed and work was halted Further aircraft carrier designs and conversion projects such as the ocean liner Europa and heavy cruiser Seydlitz were considered but in January 1943 all construction work on surface vessels ceased and naval resources were diverted to the U boat Campaign This book explains not only the history of Germany's famous Graf Zeppelin fleet carrier and German carrier conversion projects but also Italy's belated attempt to convert two of her ocean liners into carriers It considers the role of naval aviation in the two countries rearmament programmes and describes how ultimately it was only Italian seaplane carriers and German ocean going catapult equipped flying boat carriers that both Axis powers did eventually send into combat

Aircraft Carriers Norman Polmar, 2006-09-01 Aircraft Carriers is the definitive history of world aircraft carrier development and operations Norman Polmar's revised and updated two volume classic describes the political and technological factors that influenced aircraft carrier design and construction meticulously records their operations and explains their impact on modern warfare Volume I provides a comprehensive analysis of carrier developments and warfare in the first half of the twentieth century and examines the advances that allowed the carrier to replace the battleship as the dominant naval weapons system Polmar gives particular

emphasis to carrier operations from World War I through the Japanese strikes against China in the 1930s to World War II in the Atlantic Mediterranean Arctic and Pacific theaters It begins with French inventor Cl ment Ader s remarkably prescient 1909 description of an aircraft carrier The book then explains how Britain led the world in the development of aircraft carrying ships soon to be followed by the United States and Japan While ship based aircraft operations in World War I had limited impact they foreshadowed the aircraft carriers built in the 1920s and 1930s The volume also describes the aircraft operating from those ships as well as the commanders who pioneered carrier aviation Aircraft Carriers has benefited from the technical collaboration of senior carrier experts Captain Eric M Brown and General Minoru Genda as well as noted historians Robert M Langdon and Peter B Mersky Aircraft Carriers is heavily illustrated with more than 400 photographs some never before published and maps Volume II which is forthcoming from Potomac Books in the winter 2006 2007 ISBN 978 1 57488 665 8 will cover the period 1946 to the present
