Rhetoric of Revolt Peter A. DeCaro, 2003-02-28 The success of Vietnam's August Revolution of 1945 can be attributed in part to Ho Chi Minh's reconstitutive rhetoric a form of rhetorical discourse that gave the Vietnamese people a new sense of identification This reawakened identity in turn influenced a renewed demand for nationalism and independence This study explores the reconstitutive rhetoric of Ho Chi Minh In doing so it advances rhetorical theory founded on nonWestern premises and examines the cultural differences responsible for creating a rhetoric whose focus is nonEurocentric Most current thinking on reconstitutive discourse has focused on Western premises DeCaro challenges some of these premises and adds a new dimension to reconstitutive understanding Ho Chi Minh utilized the cultural heritage of the Vietnamese people as a means of creating his persona a powerful aspect of his ability to persuade In understanding Ho Chi Minh's unique form of

discourse it is then possible to see how he was able to unify his country in order to sustain a protracted conflict with the goal of securing national independence

Painful Choices David A. Welch, 2011-06-27 Under what conditions should we expect states to do things radically differently all of a sudden In this book David Welch seeks to answer this question constructing a theory of foreign policy change inspired by organization theory cognitive and motivational psychology and prospect theory He then test drives the theory in a series of comparative case studies in the security and trade domains Argentina s decision to go to war over the Falklands Malvinas vs Japan s endless patience with diplomacy in its conflict with Russia over the Northern Territories America s decision to commit large scale military force to Vietnam vs its ultimate decision to withdraw and Canada s two abortive flirtations with free trade with the United States in 1911 and 1948 vs its embrace of free trade in the late 1980s Painful Choices has three main objectives to determine whether the general theory project in the field of international relations can be redeemed given disappointment with previous attempts to reflect on what this reveals about the possibilities and limits of general theory and to inform policy Welch argues that earlier efforts at general theory erred by aiming to explain state behavior which is an intractable problem Instead since

inertia is the default expectation in international politics all we need do is to explain changes in behavior Painful Choices shows that this is a tractable problem with clear implications for intelligence analysts and negotiators Understanding Australia's Neighbours Nick Knight, 2004-07-06 The East and Southeast Asian region is of immense economic strategic and cultural significance to Australia It has also been important in defining Australia's national identity and is the origin of many of Australia's immigrants Australians therefore need to have some understanding of their northern neighbours and to be able to think about them in an informed way They need to do so not only to be able to understand the region in which they live but also to better understand themselves This book facilitates this process by providing comparisons between Asian and Australian societies The reader is encouraged to think about Australia's neighbours across a wide range of social economic and historical contexts Written in an accessible and informative way this is a book for all Australians who seek a better understanding of Australia's neighbours in East and Southeast Asia America and the Indochina Wars, 1945-1990 Lester H.
