Making Sense Ralf Hertel, 2021-07-26 Fiction is fascinating All it provides us with is black letters on white pages yet while we read we do not have the impression that we are merely perceiving abstract characters Instead we see the protagonists before our inner eye and hear their voices Descriptions of sumptuous meals make our mouths water we feel physically repelled by depictions of violence or are aroused by the erotic details of sexual conquests We submerge ourselves in the fictional world that no longer stays on the paper but comes to life in our imagination Reading turns into an out of the body experience or rather an in another body experience for we perceive the portrayed world not only through the protagonist s eyes but also through his ears nose tongue and skin In other words we move through the literary text as if through a virtual reality How does literature achieve this trick How does it turn mere letters into vividly experienced worlds This study argues that techniques of sensuous writing contribute decisively to bringing the text to life in the reader s imagination In detailed interpretations of British novels of the 1980s and 1990s by writers such as John Berger John Banville Salman Rushdie Jeanette Winterson or J M Coetzee it uncovers literary strategies for turning the sensuous experience into words and for conveying it to the reader demonstrating how we make sense in and of literature Both readers interested in the contemporary novel and in the sensuousness of the reading experience will profit from this innovative study that not only analyses the interest of contemporary authors in the senses but also pin points literary entry points for the sensuous force of reading

Photography Michelle Henning, 2023-01-06 We live in a time in which photographs have become

extraordinarily mobile They can be exchanged and circulated at the swipe of a finger across a screen The digital photographic image appears and disappears with a mere gesture of the hand Yet this book argues that this mobility of the image was merely accelerated by digital media and telecommunications Photographs from the moment of their invention set images loose by making them portable reproducible projectable reduced in size and multiplied The fact that we do not associate analogue photography with such mobility has much to do with the limitations of existing histories and theories of photography which have tended to view photographic mobility as either an incidental characteristic or a fault Photography The Unfettered Image traces the emergence of these ways of understanding photography but also presents a differently nuanced and materialist history in which photography is understood as part of a larger development of media technologies It is situated in much broader cultural contexts caught up in the European colonial ambition to grasp the world and in the development of a new artificial second nature dependent on the large scale processing of animal and mineral materials Focussing primarily on Victorian and 1920s 30s practices and theories it demonstrates how photography was never simply a technology for fixing a fleeting reality

Multisensory Perception and Action: psychophysics, neural mechanisms, and applications Zhuanghua Shi, Hermann Josef Mueller, 2015

Perception and Action in Medieval Europe Harald Kleinschmidt, 2005 Study of the changing nature of the perception of an action and the action itself and how thought processes altered radically in the middle ages Can dancers dance for a year and a day without drinking eating and sleeping Can pictures be made to speak to their viewers Can lavender purify the soul The modern mind regards it as impossible and simply regards reports that these things happened as typical of the fantastic Middle Ages In his new book however Harald Kleinschmidt argues that we should not be so swift to dismiss such matters In this thought provoking study of the logic of perception and action behind these and other stories and of the history of the five senses he argues that modern Western rationalism is peculiar in seeing an opposition between perceivers and the targets of their curiosity actors and their environments or in general terms subject and object Instead he shows that whether active or passive people saw their deeds as correlated and mutually dependent Using a wide range of textual and pictorial sources he goes on to demonstrate that the assumption of an opposition between subject and object resulted from fundamental changes of standards of perception and patterns of action that took place during the Middle Ages resulting in the emergence of a new rationalism

The Short Story in Midcentury America Sam V. H. Reese,2017-06-06 The Short Story in Midcentury America provides in depth case studies of four major writers of the post World War II era Paul Bowles Mary McCarthy Eudora Welty and Tennessee Williams examining how they used the contained aesthetics of short fiction to map out an oppositional stance to the dominant narratives both political and literary of mid twentieth century U S culture Sam V H Reese presents a new understanding of the connections between politics ideology and literary form arguing that writers employed the short story to critique the cultural mores of the early Cold War The four authors under discussion found themselves socially marginalized by mainstream U S culture due to such factors as their gender sexual orientation religion and foreign residence Reese shows that each author embraced the short story s compressed form as a means of resisting political coercion and conformity speaking out in support of freedom and open expression Reese argues that these four writers used the formal restrictions of the short story to develop a type of fiction that became recognizably countercultural

challenging the expansive sprawling novels then receiving acclaim from critics His analysis underscores the means by which each author's short stories utilized the aesthetic practices of mediums outside conventional narrative fiction Bowles's career as a composer McCarthy's criticism and memoirs Williams's playwriting and Welty's photography By studying both their prose and its conceptualization Reese reveals how writers resisted the political and stylistic pressures that defined U S literary culture in the early years of the Cold War In *The Short Story in Midcentury America* Reese establishes a new framework for considering countercultural literature in the United States reassessing the critical standing of the short story and re-evaluating the relationship between marginal social positions and literary form during the mid twentieth century
