practices Focuses on land and sea mammals and on birds in five different biomes Topical subject emphasising the work being done to ensure species survival Compelling and inspiring read illustrated with colour photographs Companion to the successful *Shaping Kruger*

**Wild Health** Cindy Engel, 2003-03 As Dr Engel emphasizes in this enticing well referenced and entertaining book Science we can learn a lot about human health by studying animal behavior in the wild Indeed some of the natural holistic and alternative human medicine being practiced today arose through the observation of wild animals In this groundbreaking work Dr Engel points out fascinating parallels between animal and human medicine She offers intriguing examples of how animals prevent and cure sickness and poisonings heal open wounds balance their diets and regulate fertility For instance chimpanzees carefully eat bitter tasting plant medicines that counter intestinal parasites elephants roam miles to find the clay they ingest to counter dietary toxins broken legged chicks have been known to eat analgesic foods that alleviate pain By observing wild health we may discover or rediscover ways to benefit our own health As Craig Stoltz of the Washington Post noted this highly readable assessment triggers more outside the double helix thoughts about human health than anything I've read recently

Blood Ivory Robin Brown, 2011-11-08 masterly account of the massacre of the African elephant The Spectator It is more than a thousand years since the exploitation of the elephant began when they were most commonly used as war elephants However it is only in the last hundred years with the coming of the great white hunters and their special elephant guns that the very existence of the African elephant has been threatened With an update by John Hanks WWF's former leading elephant scientist this new edition of Blood Ivory tells the story of how the professional hunting fraternity was the first to realise the threat to the elephant and how it kick started the whole conservation movement It is not a story with a happy ending however It is a tale of war colonialists against traditional practices and customs newly independent African countries against each other poachers and smugglers against any kind of constraint Robin Brown draws on his depth of knowledge and understanding of Africa and his career as a leading wildlife film maker to paint a vivid picture of hunting's impact on Africa's elephant population vividly portraying the powerful personalities of those involved on both sides of the massacre

**Elephant Destiny** Martin Meredith, 2009-04-27 For thousands of years the majestic elephant has roamed the African continent as beloved by man as it has been preyed upon But centuries of exploitation and ivory hunting have taken their toll now as wars and poachers continue to ravage its habitat as disease and political strife deflect attention from its plight the African elephant faces imminent extinction What will become of these magnificent beasts As the elephant's future looms ever darker Martin Meredith's concise and richly illustrated biography traces the elephant's history from the first ivory expeditions of the Egyptian pharaohs 2500 years ago to today exploring along the way the indelible imprint the African elephant has made in art literature culture and society He shares recent extraordinary discoveries about the elephant's sophisticated family and community structure and reveals the remarkable ways in which elephants show compassion and loyalty to each other Elegant illuminating and urgent Elephant

Destiny offers a beautiful and important tribute to one of earth's most magisterial creatures at the very moment it threatens to vanish from being      *Second Nature* Jonathan Balcombe, 2010-03-16 For centuries we believed that humans were the only ones that mattered. The idea that animals had feelings was either dismissed or considered heresy. Today that's all changing. New scientific studies of animal behavior reveal perceptions, intelligences, awareness, and social skills that would have been deemed fantasy a generation ago. The implications make our troubled relationship to animals one of the most pressing moral issues of our time. Jonathan Balcombe, animal behaviorist and author of the critically acclaimed *Pleasurable Kingdom*, draws on the latest research, observational studies, and personal anecdotes to reveal the full gamut of animal experience, from emotions to problem solving to moral judgment. Balcombe challenges the widely held idea that nature is red in tooth and claw, highlighting animal traits we have disregarded until now: their nuanced understanding of social dynamics, their consideration for others, and their strong tendency to avoid violent conflict. Did you know that dogs recognize unfairness and that rats practice random acts of kindness? Did you know that chimpanzees can trounce humans in short-term memory games? Or that fishes distinguish good guys from cheaters and that birds are susceptible to mood swings such as depression and optimism? With vivid stories and entertaining anecdotes, Balcombe gives the human pedestal a strong shake while opening the door into the inner lives of the animals themselves.

*Anthropomorphism, Anecdotes, and Animals* Robert W. Mitchell, Nicholas S. Thompson, H. Lyn Miles, 1997-01-01 People commonly think that animals are psychologically like themselves: anthropomorphism. But what animals do in narratives, anecdotes that support these psychological interpretations, is not. This is the first book to evaluate the significance and usefulness of the practices of anthropomorphism and anecdotalism for understanding animals. Diverse perspectives are presented in thoughtful critical essays by historians, philosophers, anthropologists, psychologists, behaviorists, biologists, primatologists, and ethologists. The nature of anthropomorphism and anecdotal analysis is examined; social, cultural, and historical attitudes toward them are presented; and scientific attitudes are appraised. Authors provide fascinating in-depth descriptions and analyses of diverse species of animals, including octopi, great apes, monkeys, dogs, sea lions, and, of course, human beings. Concerns about and proposals for evaluations of a variety of psychological aspects of animals are discussed, including mental state attribution, intentionality, cognition, consciousness, self-consciousness, and language.

**Mammals of Africa: Volume I** Jonathan Kingdon, 2014-11-20 *Mammals of Africa* (MoA) is a series of six volumes which describes in detail every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted, and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology, and evolution, including reference to fossil and molecular data of Africa's mammals. With more than 1,160 species and 16–18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format, with detailed profiles of every species and higher taxa. The series includes

hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information This first volume in the series comprises eight introductory chapters covering topics such as evolution geography and geology biotic zones classification behaviour and morphology The rest of the book is devoted to the Afrotheria a grouping that comprises six orders and 49 species these are the hyraxes elephants manatees otter shrews golden moles sengis elephant shrews and Aardvark

*The Emperor's Embrace* Jeffrey Masson, 2001-02-28 Jeffrey Moussaieff Masson's marvelous Jane Goodall New York Times bestseller When Elephants Weep made us re evaluate the emotional lives of animals And in his follow up New York Times bestseller Dogs Never Lie About Love Masson reflected with intelligence and originality Los Angeles Times Sunday Book Review on the emotional world of dogs Now in *The Emperor's Embrace* Masson offers a remarkable look at one of the most fulfilling roles in the animal world fatherhood With fascinating insight impeccable research and captivating writing controversial psychoanalyst Jeffrey Masson a new father himself introduces us to the world's best dads He takes us to such places as Antarctica as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months nestled beneath a special brood pouch And he tells us how once the babies hatch the fathers snuggle the babies on their feet until the mother returns from her time at sea feeding them a special milk like substance until her arrival Masson a superb

storyteller showcases the extraordinary behavior of outstanding fathers heroes among animals including the wolf and why wolves make good fathers and dogs don't the beaver who encourages his young to cling to his tail as he navigates through ponds the sea horse the only male animal that gives birth to its young the marmoset the South American monkey who carries his babies for the first two years of their lives wherever he goes Masson also examines nature's worst fathers lions langurs bears and humans He shows that when a father does care for his young as with the beaver we immediately look for a biological and not an emotional explanation But Masson demonstrates that for these animals as with humans fatherhood is a profound all encompassing experience Groundbreaking compelling inspirational Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world yet always returns to the heart For animal lovers fathers mothers sons and daughters everywhere The Emperor's Embrace is a book that will forever change our perceptions of parenthood and family love

The Amboseli Elephants Cynthia J. Moss, Harvey Croze, Phyllis C. Lee, 2011-07-18 Elephants have fascinated humans for millennia Aristotle wrote of them with awe Hannibal used them in warfare and John Donne called the elephant Nature's greatest masterpiece The only harmless great thing Their ivory has been sought after and treasured in most cultures and they have delighted zoo and circus audiences worldwide for centuries But it wasn't until the second half of the twentieth century that people started to take an interest in elephants in the wild and some of the most important studies of these intelligent giants have been conducted at Amboseli National Park in Kenya The Amboseli Elephants is the long awaited summation of what's been learned from the Amboseli Elephant Research Project AERP the longest continuously running elephant research project in the world Cynthia J Moss and Harvey Croze the founders of the AERP and Phyllis C Lee who has been closely involved with the project since 1982 compile more than three decades of uninterrupted study of over 2 500 individual elephants from newborn calves to adult bulls to old matriarchs in their 60s Chapters explore such topics as elephant ecosystems genetics communication social behavior and reproduction as well as exciting new developments from the study of elephant minds and cognition The book closes with a view to the future making important arguments for the ethical treatment of elephants and suggestions to aid in their conservation The most comprehensive account of elephants in their natural environment to date The Amboseli Elephants will be an invaluable resource for scientists conservationists and anyone interested in the lives and loves of these extraordinary creatures

**Ecology of African Mammals** M. J. Delany, D. C. D. Happold, 1979

Selection of Recent Books Published in Great Britain 1940-Apr. 1941, 1976

**African Ungulates** Walter Leuthold, 2012-12-06 This book has been written mostly within sight of wild African ungulates at the research center in Tsavo East National Park Voi Kenya While this had many positive aspects there were also a few drawbacks The main one of these is the fact that Voi is not exactly at the hub of scientific activity even if we restrict ourselves to African ungulates Thus whereas I had felt initially that I was sufficiently familiar with ethological work on these animals to write a useful review it soon became woefully evident that this assumption was erroneous Over the last few years studies on African

ungulates have proliferated and results are being published in journals almost all over the world. My location in East Africa was sometimes less than ideal with respect to access to the most recent literature and I depended to a considerable extent on the goodwill of colleagues in giving or lending me relevant papers. I am happy to report that I received a great deal of support and cooperation in this respect. Nevertheless, I may have overlooked some important papers inadvertently; their authors should not feel slighted by such omissions which only reflect availability of literature to me. Readers may also notice a considerable geographical bias in favor of East Africa at the expense of other African regions, particularly South Africa.
