*Reading Our Histories, Understanding Our Cultures* Kathleen McCormick, 1999 Reading Our Histories Understanding Our Cultures A Sequenced Approach to Thinking Reading and Writing is based on the assumption that the life of every person is intimately connected to the life of the culture This innovative class tested anthology translates the best of current work in cultural studies and process approaches to writing into practical sequenced assignments motivating students to develop essential critical thinking reading and writing skills Students are asked to engage in two complementary forms of inquiry consistently throughout the book historical analysis in which they analyze change and continuity over time and cultural analysis in which they explore how and why different perspectives can exist within the same time period This kind of inquiry is meant to engage students personal interest and in the process to reconceptualize what is thought of as the personal within larger social contexts It enables students to move from writing just opinion to writing analytically and persuasively about their own perspectives and those of others The readings in each chapter carefully juxtapose older historical primary texts with contemporary texts to give students a sense of the historical antecedents of current debates Historical and cultural analysis is integrated in assignment sequences at the end of each chapter Each chapter also gives students opportunities to engage in fastwriting assignments linking their personal experiences with the issues about which they are reading In short Reading Our Histories Understanding Our Cultures A Sequenced Approach to Thinking Reading and Writing teaches students to trace how a particular issue is woven into the larger cultural and social fabric and to negotiate among different perspectives from the past and present to develop a position of their own This kind of work is where genuine critical inquiry begins *Reading Our Histories, Understanding Our Cultures* ,2008-01-01 **Reading and**

following the text sections and readings help students understand the ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies such as the growing inequality of wealth in America and its impact on the finances of college students as expressed in paired sets of readings from the political left and right Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media as well as in education itself are foregrounded as topics for rhetorical analysis Forthcoming Books Rose Arny,2002
