 Fiorello,2014-04-04 This volume summarizes research on important topics in cognitive research and discusses what must be  
 done to apply this research in early elementary classrooms Purposefully it focuses on areas of cognitive research that have  
 only recently begun to be studied in early elementary classrooms or that based on educational and psychological theory  
 appear to have the greatest implications for early classroom learning Part 1 Cognitive Applications in Early Elementary  
 Classrooms examines topics germane to the cognitive functioning of young children working memory executive functioning  
 theory of mind phonemic awareness and neuropsychological processing in the context of early elementary classrooms Part 2  
 Considerations for Further Research Methods Policy and Issues looks at practical and methodological issues of which applied  
 cognitive researchers must remain cognizant methodology research designs the gap between science and policy and means  
 by which this gap can be diminished and the need to consider how issues like ecological validity individual differences  
 treatment integrity and the relation between assessment and intervention are integral to designing applied cognitive  
 research studies The current emphasis on empirically supported treatments and research based teaching and intervention in  
 the schools and legislation such as No Child Left Behind and the Individuals with Disabilities Education Improvement Act  
 have focused attention on the scientific basis of educational practice However applying research to the environment of the  
 schools is not an automatic process Bridging the gap has several prerequisites researchers must attend to the ecological  
 validity of their studies universities must incorporate the results of research into their pre professional training programs and  
 schools must support their inservice staff in developing new knowledge and skills Applied Cognitive Research in K 3  
 Classrooms contributes strongly to these goals not only by providing researchers professionals and graduate students in the  
 fields of cognitive psychology school psychology educational psychology educational research and early elementary level  
 education with current understanding but also helping to set an agenda for further research that applies cognitive  
 psychology in early elementary classrooms      Content Area Reading and Learning Diane Lapp,James Flood,Nancy
