Intended for educators policymakers and anyone concerned with the nation s reading skills this booklet draws on four recent reports in the Nation s Report Card series which are based on findings of the National Assessment of Educational Progress NAEP The first chapter discusses two important components of literacy the ability to achieve a surface understanding of written materials and the ability to reason effectively about one s reading and writing NAEP results are briefly discussed as a basis for the second chapter which presents an overview of literacy development in America The third chapter focuses on those who are at risk because of poor literacy skills particularly children and young adults from minority groups and children without home support for literacy The fourth chapter discusses the impact that an early exposure to print appropriate instruction and homework can have on literacy skills The final chapter explores two important initiatives for educators policymakers and the nation 1 the at risk population must be provided with targeted help to ensure that it has the opportunity to develop the literacy skills necessary for full participation in this society and 2 educational approaches must be modified so that all children learn to reason more effectively about what they read and write Recommendations derived from these initiatives are outlined for policymakers administrators and teachers Graphs and statistical data are included JD      **Reading, Writing and Reasoning** Gavin Fairbairn, 1996-11-01

Review of 1st Edition The book s title is absolutely accurate in describing how the authors give the most practical and clear advice on all of the problematic aspects of reading for meaning developing analytic and coherent thinking and writing in coursework This book will be invaluable for any student and it would be sad if most are too busy writing essays and undertaking examinations to read it Nursing Times Review of this edition I felt this was a real back to basics text in parts that went over some rules of

thumb that even I d forgotten about I felt also that part 3 entered the domain of some of the more technical arguments when discussing thought processes The sub heading Criticizing others is not a blood sport resonated oh so true A thoroughly worthwhile and enjoyable text John Carson Senior Lecturer Northumbria University This guide is a must for all students who find writing essays difficult It will enable them to develop essential skills in reading writing and reasoning The authors are both very experienced in helping students to develop proficiency in these areas Written in plain language the book encourages the development of key skills in reading and evaluating texts in the use of a clear and effective writing style and in cogent argument The practical advice examples and exercises are invaluable for all students who would like to become better readers writers and reasoners     Reading, Writing, and Reasoning Marilyn S. Sternglass,1991     **Integrating College Study Skills** Peter Elias Sotiriou,1999 This skills based text goes beyond presenting study strategies in a generic way and teaches students how to use these strategies effectively by integrating their reading writing and listening skills
