Readings In Medieval History Vol 1 The Early Middle Ages:

Readings in Medieval History, Volume I Patrick Geary, 2016-04-01 Patrick J Geary's highly acclaimed collection of source materials on the medieval period is well known for offering an excellent selection of substantial excerpts or whole documents wherever possible from the most widely studied historical texts. This much anticipated fifth edition features a larger format as well as enlarged type to make the collection more reader friendly. Study questions have been added at the end of each section to help students focus on key points in the text. Volume I includes a new selection from the Rule of St Benedict and a new translation of Einhard's *The Life of Charlemagne* as well as a color photo section introducing students to fascinating medieval art such as a seventh century stone from Hornhausen, a shirt that belonged to Queen Bathild, and a page from the St Petersburg Bede.

Readings in medieval history Patrick J. Geary, 1992 *A Companion to the Abbey of Cluny in the Middle Ages*, 2021-11-29 Founded in 910 by Duke William of Aquitaine, the abbey of Cluny rose to prominence in the eleventh century as the most influential and opulent center for monastic devotion in medieval Europe. While the twelfth century brought challenges both internal and external, the Cluniacs showed remarkable adaptability in the changing religious climate of the high Middle Ages. Written by international experts representing a range of academic disciplines, the contributions to this volume examine the rich textual and material sources for Cluny's history, offering not only a thorough introduction to the distinctive character of Cluniac monasticism in the Middle Ages but also the lineaments of a detailed research agenda for the next generation of historians. Contributors are Isabelle Ros, Steven Vanderputten, Marc Saurette, Denyse Riche, Susan Boynton, Anne Baud, Sbastien Barret, Robert Berkhofer III, Isabelle Cochelin, Michael Hnchen, Gert Melville, Eliana Magnani, Constance B. Bouchard, Benjamin Pohl, and Scott G. Bruce.

Sources for the History of Western Civilization Michael Burger, 2024-05-01 *Sources for the History of Western Civilization* is a primary source reader designed specifically to allow undergraduate students to interact with historical documents. Michael Burger provides only the editorial guidance that students truly require without unnecessary interventions. The third edition gives special stress to certain genres including letters and biographical writings to facilitate comparisons across time. Introductions to sources are brief, encouraging students to make their own assessments and giving instructors the freedom to supplement where desired. The third edition features substantive revisions and additional coverage of key topics throughout, as well as new material on the Crusades, Jewish persecution, and European expansion.

A History of the Laws of War: Volume 3 Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself

The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself
