Is South Asia Ready for Take Off? Ms. Manuela Goretti, Mr. Daisaku Kihara, Mr. Ranil M Salgado, Ms. Anne Marie Gulde, 2019-11-04 Since the mid 1980s durable reforms coupled with prudent macroeconomic management have brought steady progress to the South Asia region making it one of the world's fastest growing regions Real GDP growth has steadily increased from an average of about 3 percent in the 1970s to 7 percent over the last decade Although growth trajectories varied across countries reforms supported strong per capita income growth in the region lifting over 200 million people out of poverty in the last three decades Today South Asia accounts for one fifth of the world's population and thanks to India's increasing performance contributes to over 15 percent of global growth Looking ahead the authors find that South Asia is poised to play an even bigger role in the global economy in both relative and absolute terms India has overtaken China as the fastest growing large economy and South Asia's contribution to global growth is set to increase while more mature economies decelerate Greater economic diversification with an expansion of the service sector improvements in education and a still sizable demographic dividend are among the key elements underpinning this performance Based on demographic trends more than 150 million people in the region are expected to enter the labor market by 2030 This young and large workforce can be South Asia's strength if supported by a successful high quality and job rich growth strategy Amid a changing global economic landscape the authors argue that South Asia will need to leverage on all sectors of the economy in a balanced way supporting improvements in agricultural productivity and a sustainable expansion of manufacturing while promoting higher skill services to achieve this goal

Reconnaissance Is Black David W. Irvin, 2000 **Cyberinsurance Policy** Josephine Wolff, 2022-08-30 Why cyberinsurance has not improved cybersecurity and what governments can do to make it a more effective tool for cyber risk management As cybersecurity incidents ranging from data breaches and denial of service attacks to computer fraud and ransomware become more common a cyberinsurance industry has emerged to provide coverage for any resulting liability

business interruption extortion payments regulatory fines or repairs In this book Josephine Wolff offers the first comprehensive history of cyberinsurance from the early Internet Security Liability policies in the late 1990s to the expansive coverage offered today Drawing on legal records government reports cyberinsurance policies and interviews with regulators and insurers Wolff finds that cyberinsurance has not improved cybersecurity or reduced cyber risks Wolff examines the development of cyberinsurance comparing it to other insurance sectors including car and flood insurance explores legal disputes between insurers and policyholders about whether cyber related losses were covered under policies designed for liability crime or property and casualty losses and traces the trend toward standalone cyberinsurance policies and government efforts to regulate and promote the industry Cyberinsurance she argues is ineffective at curbing cybersecurity losses because it normalizes the payment of online ransoms whereas the goal of cybersecurity is the opposite to disincentivize such payments to make ransomware less profitable An industry built on modeling risk has found itself confronted by new technologies before the risks posed by those technologies can be fully understood
