Ch 1: The book opens with the conceptual and methodological issues associated with multilevel and longitudinal modeling, followed by a discussion of SPSS data management techniques which facilitate working with multilevel, longitudinal and cross classified data sets. Chapters 3 and 4 introduce the basics of multilevel modeling, developing a multilevel model, interpreting output and trouble shooting common programming and modeling problems. Models for investigating individual and organizational change are presented in chapters 5 and 6, followed by models with multivariate outcomes in chapter 7.
