Schwartz, 2013-03-14 In reflecting on this book and the process of writing it the most pervasive theme I find is that of confluence I drew much of the energy needed to write the book from the energy that resides at the confluence or nexus of contrasting ideas At the most general level the topic of arts subsidy offered a means of exploring simultaneously two of my favorite philosophical subjects aesthetics and politics The risk of a dual focus is of course that you do neither topic justice However the bigger payoff of this strategy resides in finding new and interesting connections between two otherwise disparate topics Developing such connections between art and politics led directly to many of the book's positive arguments for subsidy At a deeper level the book exploits a confluence of contrasting philosophical methodologies The central problem of the book politically justifying state support of the arts is cast in the Anglo American tradition of analytical philosophy Here normative arguments of ethics and politics are scrutinized with an eye toward developing a defensible justification of state action Yet while the book initially situates the subsidy problem within this analytical tradition its positive arguments for subsidy draw heavily from the ideas and methods of Continental philosophy Rather than adjudicating normative claims of ethical and political truth the Continental tradition aims at the hermeneutical task of interpreting and describing structures of human meaning

returned By August of 1944 after Mussolini was dethroned and German backed neo Fascism was only a Nazi puppet government it was apparent to everyone but the most rabid Nazis that Germany had lost the war Even then SS Officers and contingents from Gorings brigades loaded art from discovered ricoveri into trucks and drove them to northern Italy which was under complete German control and occupation The storage locations for the looted art were kept secret from the Italians until the war ended As the Allies approached the great city of Florence the withdrawing Nazis mined and destroyed some of the most precious medieval and renaissance buildings and bridges

America and the Art of the Possible

Christopher Buskirk,2023-01-10 Between 1920 and 1950 America saw an unprecedented expansion of wealth and power underwritten by technological innovation cultural confidence and victory in war American elites won World War II rebuilt the world order with America at its head inaugurated the jet age and put a man on the moon The boom led to a larger richer middle class that confirmed America s best ideals By the early 1970s that ended American elites have captured a disproportionate share of the social and economic rewards over the last fifty years Meanwhile the middle class has shrunk in size and has become economically insecure owning a smaller share of national wealth than at any time in the nation s history This has happened even while most households have two income earners versus the single income households that characterized the period of shared prosperity At the same time technological innovation that improves people s standard of living has dramatically slowed These trends undermine the basic premise behind the broad acceptance of a meritocratic elite whose rule is predicated on the belief that if the best rise to the top their talent and energy will create a rising tide that lifts all boats We had that once We can have it again

The Essay Film Timothy Corrigan, 2011-08 Why have certain kinds of documentary and non narrative films emerged as the most interesting exciting and provocative movies made in the last twenty years Ranging from the films of Ross McElwee Bright Leaves and Agnes Varda The Gleaners and I to those of Abbas Kiarostami Close Up and Ari Folman Waltz with Bashir such films have intrigued viewers who at the same time have struggled to categorize them Sometimes described as personal documentaries or diary films these eclectic works are rather best understood as cinematic variations on the essay So argues Tim Corrigan in this stimulating and necessary new book Since Michel de Montaigne essays have been seen as a lively literary category and yet despite the work of pioneers like Chris Marker seldom discussed as a cinematic tradition The Essay Film offering a thoughtful account of the long rapport between literature and film as well as novel interpretations and theoretical models provides the ideas that will change this
