## **Real American Heroes Secrets To Their Success:**

*Real American Heroes* Jim Weber, Jim Gibbs, 2005-02-01 Much gain has been made in understanding addiction and its treatment in the last two decades. However, training for addiction treatment team medical doctors, psychiatrists, psychologists, social workers, dentists, pharmacists, school and addiction counselors remains shallow and in most instances completely wanting. Many universities that train addiction treatment teams do not offer courses in addiction. This compilation explores major areas of interest in addiction studies. With thorough investigation, Dr. Wachuku highlights the role of genetics in addiction. He also emphasizes that other facets such as environmental and social factors are equally worthy of consideration. He delves into societal enabling and codependency issues from a perspective that other addiction researchers have taken for granted. At the eve of the millennium, pharmacotherapy, the use of medication to treat addiction, became a buzzword in the addiction treatment field. The use of medications such as naltrexone, acamprosate, bupropion, UH232, to mention but a few, promise new hope in lasting cure for addiction. Dr. Wachuku examines this new trend in addiction treatment and offers strong professional opinion on the role of counseling in pharmacotherapy. Dual diagnosis, substance abuse induced mental health problems or mental health problems exacerbated by substance abuse, is another area of treatment that has received considerable attention in recent years. While working as a consultant in a dual diagnosis clinic, Dr. Wachuku saw opportunity for case study to examine different treatment modalities for dual diagnosis. He traces the origin of dual diagnosis, comprehensive treatment in the United States, epitomizes the shortcomings of current treatment in the facility he consulted with, and offers solutions to existing problems. Harm reduction is yet another treatment option that has received a mixed welcome. Dr. Wachuku sheds light on the origin of harm reduction in the United States. He carefully examines the controversial Swiss Heroin Project, the first global clinical attempt to use pure grade heroin to treat heroin addicts. In contrast, he reviews the Chinese Compulsory treatment model, an attempt to fully understand treatment approaches in foreign countries. This anthology is highly recommended as a supplemental text to students in addiction studies. Even more so, this compilation raises food for thought and prods addiction professionals interested in research to challenge some of the findings in this book. Indeed, this book is a must own for not only professionals in the addiction field but to all in sundry who may be affected by addiction in one form or another. It offers useful insight into addiction and challenges treatment professionals to explore other treatment options.
