

An aerial photograph of a vast desert landscape, showing a series of parallel, wavy sand dunes that stretch across the frame. The dunes are light-colored, and the shadows between them create a rhythmic pattern of light and dark. The sky is not visible, focusing the viewer's attention on the terrain.

Blackbourn, James Retallack, 2015-01-15 What makes a person call a particular place home Does it follow simply from being born there Is it the result of a language shared with neighbours or attachment to a familiar landscape Perhaps it is a piece of music or a painting or even a travelogue that captures the essence of home And what about the sense of belonging that inspires nationalist or local autonomy movements Each of these can be a marker of identity but all are ambiguous Where you were born has a different meaning if like so many modern Germans you have moved on and now live elsewhere Representing the national interest in parliament becomes more difficult when voters demand attention to local and regional issues or when ethnic tensions erupt In all these situations the landscape of home takes on a more elusive meaning *Localism Landscape and the Ambiguities of Place* is about the German nation state and the German speaking lands beyond it from the 1860s to the 1930s The authors explore a wide range of subjects music and art elections and political festivities local landscape and nature conservation tourism and language struggles in the family and the school Yet they share an interest in the ambiguities of German identity in an age of extraordinarily rapid socio economic change These essays do not assume the primacy of national allegiance Instead by using the sense of place as a prism to look at German identity in new ways they examine a sense of Germanness that was neither self evident nor unchanging **Facs - Florida Atlantic Comparative Studies** Ilaria

how discourses and practices of care look to shape particular forms of eating and food preferences and how it is often in the bodies of individual consumers that eating and care encounter one another

Space, Place, and Landscape in Ancient Greek Literature and Culture Kate Gilhuly, Nancy Worman, 2014-09-22 This book brings together a collection of original essays that engage with cultural geography and landscape studies to produce new ways of understanding place space and landscape in Greek literature from the fifth and fourth centuries BCE The authors draw on an eclectic collection of contemporary approaches to bring the study of ancient Greek literature into dialogue with the burgeoning discussion of spatial theory in the humanities The essays in this volume treat a variety of textual spaces from the intimate to the expansive the bedroom ritual space the law courts theatrical space the poetics of the city and the landscape of war And yet all of the contributions are united by an interest in recuperating some of the many ways in which the ancient Greeks in the archaic and classical periods invested places with meaning and in how the representation of place links texts to social practices

Place Tim Cresswell, 2014-08-29 Thoroughly revised and updated this text introduces students of human geography and allied disciplines to the fundamental concept of place combining discussion about everyday uses of the term with the complex theoretical debates that have grown up around it A thoroughly revised and updated edition of this highly successful short introduction to place Features a new chapter on the use of place in non geographical arenas such as in ecological theory art theory and practice philosophy and social theory Combines discussion about everyday uses of the term place with the more complex theoretical debates that have grown up around it Uses familiar stories drawn from the news popular culture and everyday life as a way to explain abstract ideas and debates Traces the development of the concept from the 1950s through its subsequent appropriation by cultural geographers and the linking of place to politics

Why We Eat, How We Eat Emma-Jayne Abbotts, Anna Lavis, 2016-02-11 Why We Eat How We Eat maps new terrains in thinking about relations between bodies and foods With the central premise that food is both symbolic and material the volume explores the intersections of current critical debates regarding how individuals eat and why they eat Through a wide ranging series of case studies it examines how foods and bodies both haphazardly encounter and actively engage with one another in ways that are simultaneously material social and political The aim and uniqueness of this volume is therefore the creation of a multidisciplinary dialogue through which to produce new understandings of these encounters that may be invisible to more established paradigms In so doing Why We Eat How We Eat concomitantly employs eating as a tool a novel way of looking

while also drawing attention to the term eating itself and to the multiple ways in which it can be constituted The volume asks what eating is what it performs and silences what it produces and destroys and what it makes present and absent It thereby traces the webs of relations and multiple scales in which eating bodies are entangled in diverse and innovative ways contributors demonstrate that eating draws into relationships people places and objects that may never tangibly meet and show how these relations are made and unmade with every mouthful By illuminating these contemporary encounters Why We Eat How We Eat offers an empirically grounded richness that extends previous approaches to foods and bodies

Territory David Delaney, 2008-04-15 This short introduction conveys the complexities associated with the term territory in a clear and accessible manner It surveys the field and brings theory to ground in the case of Palestine A clear and accessible introduction to the complexities associated with the term territory Provides an interdisciplinary survey of the many strands of research in the field Addresses specific areas including interpretations of territorial structures the relationship between territoriality and scale the validity and fluidity of territory and the practical social processes associated with territorial re configurations Stresses that our understanding of territory is inseparable from our understanding of power Uses Israel Palestine as an extended illustrative case study The author's strong legal and geographical background gives the work an authoritative perspective
