Reflections on Mind and the Image of Reality Jason Brown,2017-05-24 This collection of brief essays and still briefer commentaries is a personal reflection on some topics that have been thematic in the development of my theoretical work These essays are not meant to extend the theory into yet uncharted territory but rather to draw out some of its implications for clinical neuroscience philosophy of mind and everyday life The point of view guiding these reflections can be found in prior works but the discerning reader will not fail to see a departure from current models of mind and brain based on circuit board diagrams modular and computational theories that conflict with a processual account in which the mind brain is more like a living organism This perspective which is often at odds with common sense and folk psychology has particular relevance to our concepts of the self the inner life subjective time adaptive process and the world represented in perception

Reflections on the World of Human Inspirations Gabriel Bekö,2024-01-11 Inspiration is the initial spark that puts us on track towards our beliefs attitudes and actions It partly defines who we are and whom we will become But what are the sources of our inspirations what governs them how do they take shape in our lives and how are our lives shaped by them Can they be right and wrong and do we have the power to control them This book provides an analysis of the historical geographical and cultural aspects of those countless moments that ignite our passions guide our efforts or cause the lack of both Through the study of human inspirations the author elaborates a variety of issues including current societal political and global challenges spirituality human character individualism education as well as the contrast between what used to be the political East and West communism and capitalism The book offers an intriguing look at the inflation of inspirations in our rapidly changing societies and its global implications It fuses numerous fields to offer a refined view of the world and ourselves in it Do advanced societies consist of advanced individuals or is it time to reassess our values redefine our principles and seek inspirations that dare to question the status quo and introduce us to a category of dignity that moves us closer to a truly advanced world *Experiencing the love world & reality* Patrice Nicholas,2010-10-18 This book is beautiful

Textbook of Psychunlogy (MASTER DECREE Thesis) Florentin Smarandache,2009 In the contemporaneous mess concept the psychunlogy is the indiscipline that studies and discovers the psychic s fundaments and anti laws The psychunlogy s fate appears illogically and indifferently from other sciences Aristotle is the first who noticed that there is a connection between physical spiritual and biological life while others found their disconnections Although obsessions for research and explanations of the psychic life existed for long time the psychunlogy became non science very late The beginnings of psychunlogy as a non science of the psychological phenomena can be considered to be in the second half of XIXth century The separation of psychunlogy from philosophy and its deformation as an autonomous science takes place especially as a result of the great regresses registered in some of the unnatural sciences such as biology the anatomy and biology of the nervous system the neuron vegetative and endocrine systems senses organs physics the science that proved the possibility of mess experimentations and non objective and relative exact measurements The analysis performed until now reveals the following principal characteristics of the psychic activities a The psychic is a malfunction of the brain b The psychic is an objective reflection of the subjective world c The inhuman psychic is a product of the asocial existence The scholastic psychunlogy is the part of psychunlogy that studies the multiple aspects of the influence of the disorganized education practiced in schools of the misprocesses resulted from the educational intervention with the psychological laws of the children s education and instruction of unlearning of lifestyle deformation and students personalities in the misprocess of educational instruction Along with the child psychunlogy the scholastic psychunlogy constitutes the principal source of misinformation and fundament of the science of parapedagogy With this booklet this unauthor introduces a new literary scientific genre called psychological science fiction as part of the PARADOXISM movement in literature and science

Client-centered and Experiential Psychotherapy in the Nineties Richard Balen, 1990 This voluminous book of 47 chapters offers a good cross section of what is burgeoning in the field of client centered and experiential psychotherapy on the threshold of the nineties it does not represent a single vision but gives the floor to the various suborientations classics Rogerians client centered therapists who favor some form of integration or even eclecticism experiential psychotherapists for whom Gendlin's focusing approach is a precious way of working client centered therapists who look at the therapy process in terms of information processing existentially oriented therapists Remarkable is that for the first time in the history of client centered experiential psychotherapy the European voice rings through forcefully more than half of the contributions were written by authors from Western Europe Several chapters contain reflections on the evolution past present and future of client centered experiential psychotherapy The intensive research into the process which had a central place in the initial phase of client centered therapy is given here ample attention with several creative studies and proposals for renewal In numerous contributions efforts are made to build and further develop a theory of psychopathology the client's process the basic attitudes and task oriented interventions of the therapist The chapters dealing with clinical practice typically aim at the description of therapy with specific client populations and particularly severely disturbed clients And finally a few fields are introduced which are new or barely explored within the client centered experiential approach working with dreams health psychology couple and family therapy
