bringing the resources of contemporary metaphysics to bear In the place of traditional theories he introduces a model based on a new distinction between the grounds and the anchors of social facts Epstein illustrates the model with a study of the nature of law and shows how to interpret the prevailing traditions about the social world Then he turns to social groups and to what it means for a group to take an action or have an intention Contrary to the overwhelming consensus these often depend on more than the actions and intentions of group members *Argumentation in Multi-Agent Systems* Iyad Rahwan, Simon D.
