Rubkii Put:

Revoliutsiia! Demonstratsiia! Matthew S. Witkovsky, Devin Fore, 2017-01-01 Groundbreaking new insight into a rich spectrum of early Soviet art and its spaces of display Published on the centenary of the Russian Revolution this landmark book gathers information from the forefront of current research in early Soviet art providing a new understanding of where art was presented who saw it and how the images incorporated and conveyed Soviet values More than 350 works are grouped into areas of critical importance for the production reception and circulation of early Soviet art battlegrounds schools the press theaters homes and storefronts factories festivals and exhibitions Paintings by El Lissitzky and Liubov Popova are joined by sculptures costumes and textiles decorative arts architectural models books magazines films and more Also included are rare and important artifacts among them a selection of illustrated children's notes by Joseph Stalin's daughter Svetlana Allilueva as well as reproductions of key exhibition spaces such as the legendary Obmokhu Constructivist exhibition in 1921 Aleksandr Rodchenko's Workers Club in 1925 and a Radio Orator kiosk for live projected and printed propaganda designed by Gustav Klutss in 1922 Bountifully illustrated this book offers an unprecedented cross disciplinary analysis of two momentous decades of Soviet visual culture *Napoleon's Invasion of Russia, 1812* Eugene Tarlé, 2018-09-03 Napoleon Bonaparte 1769-1821 is one of the most illustrated political and military figures of the last two millennia He has remained in the memory of the world as a legend that the passage of the years has failed to blur On the contrary Napoleon Bonaparte widely continues to be considered the personification of human genius Originally published in this English translation in 1942 leading Russian historian Evgeny Tarlé details Napoleon's military campaign to invade Russia in the early nineteenth century The campaign of 1812 was more frankly imperialistic than any other of Napoleon's wars it was more directly dictated by the interests of the French upper middle class The war of 1796-7 the conquest of Egypt in 1798-9 the second Italian campaign and the recent defeat of the Austrians could still be justified as necessary measures of defence against the interventionists The Napoleonic press called the Austerlitz campaign self defence against Russia Austria and England The average Frenchman considered even the subjugation of Prussia in 1806-7 no more than a just penalty inflicted on the Prussian court for the arrogant ultimatum sent by Frederick William III to the peace loving Napoleon constantly harried by troublesome neighbours Napoleon never ceased to speak of the fourth conquest of Austria in 1809 as a defensive war provoked by Austrian threats Only the invasion of Spain and Portugal was passed over in discreet silence The War of 1812 was a struggle for survival in the full sense of the word a defensive struggle against the onslaughts of the imperialist culture E V Tarlé **Soviet Forest Industries** Peter Blandon, 2019-08-21 Forest industries represent an important segment of the Soviet economy accounting for five percent of the total industrial output and providing essential materials for other key industries This book the first in depth study of Soviet forestry in the English language looks at the organizational planning economic and technological aspects of the industry Mr Blandon first discusses labor force trends and geographical

features of the country's forest resources then assesses the forest industry's modernization program. He analyzes the past performance of capital investment in the industry and makes projections about the effects of future investments in order to estimate the Soviet Union's future timber output. Throughout the book, considerable attention is devoted to the Soviet planning system and its influence on decision making. **Folia Forestalia**, 1984

Assessing the War on Terror Charles Webel, Mark Tomass, 2017-02-17 This volume is a collection of articles that critically examine the efficacy, ethics, and impact of the War on Terror as it has evolved since 9/11. During the decade and a half of the Global War on Terror (GWOT), numerous books have considered the political, psychosocial, and economic impacts of terrorism. However, there has been little systematic effort to examine the effectiveness of the GWOT in achieving its goals. Furthermore, there is virtually nothing that presents a comparative analysis of the GWOT by the people most directly affected by it: citizens and scholars from conflict zones in the Middle East. There is therefore great need for a book that analyzes the strategies, tactics, and outcomes of the GWOT and that also presents facts and ideas that are missing or underrepresented in the dominant public narratives. The contributions in this volume were chosen to specifically address this need. In doing so, it uniquely provides not only Western perspectives of the GWOT but also importantly includes perspectives from the Middle East and those most directly affected by it, including contributions from scholars and policy makers. Overall, the contributions demonstrate how views differ based on geographical location and how views have changed during the course of the still evolving War on Terror. The book will be of much interest to students and scholars of terrorism and counterterrorism, foreign policy, Middle Eastern politics, security studies, and IR, as well as policy makers.

International Encyclopedia of Transportation, 2021-05-13 In an increasingly globalised world, despite reductions in costs and time, transportation has become even more important as a facilitator of economic and human interaction. This is reflected in technical advances in transportation systems, increasing interest in how transportation interacts with society, and the need to provide novel approaches to understanding its impacts. This has become particularly acute with the impact that Covid-19 has had on transportation across the world at local, national, and international levels. The *Encyclopedia of Transportation* Seven Volume Set, containing almost 600 articles, brings a cross-cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields, including engineering, operations research, economics, geography, and sociology, in order to understand the changes taking place. Emphasising the interaction between these different aspects of research, it offers new solutions to modern-day problems related to transportation. Each of its nine sections is based around familiar themes but brings together the views of experts from different disciplinary perspectives. Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines, different parts of the world, and different social perspectives. The nine sections are structured around the following themes: Transport Modes; Freight Transport and Logistics; Transport Safety and Security; Transport Economics; Traffic Management; Transport Modelling and Data Management; Transport Policy and Planning; Transport Psychology; Sustainability.

and Health Issues in Transportation Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future oriented view of new research areas or challenges The end result is a reference work that offers researchers and practitioners new approaches new ways of thinking and novel solutions to problems All encompassing and expertly authored this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world Provides a forward looking and integrated approach to transportation Updated with future technological impacts such as self driving vehicles cyber physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach including sets of comparative studies and applications
