Rudolf Steiner Als Architekt Von Wohnund Zweckbauten:

Rudolf Steiner als Architekt von Wohn- und Zweckbauten Erich Zimmer, 1971 Architecture as a Synthesis of the Arts
Rudolf Steiner, 1999 8 lectures plus extracts and notes CW 286 This collection introduces Rudolf Steiner's vision of architecture as a culmination of the arts. Such architecture unites sculpture, painting, and engraving, as well as drama, music, and dance, a vital synthesis of all the arts working in cooperation through the common ideal of awakening us to our individuality and task in life. Unlike many of his contemporaries, Steiner's ideas did not remain abstract. Within his lifetime, he was able to design and construct a number of buildings, including his architectural masterpiece, the Goetheanum, a center for culture and arts near Basle, Switzerland. In these lectures, Steiner describes with reference to the Goetheanum the importance of an architecturally coherent and integrated community and how this in turn affects social unity and harmony. These lectures offer a panorama of the development of architecture in parallel with the emerging human soul in human evolution. This is a valuable collection for all students of architecture, the arts, social science, and those looking for a deeper spiritual understanding of the art of architecture. Includes eight color plates and 30 black and white illustrations. CONTENTS: Part One: The Temple Is the Human Being; An Art Architecture that Reveals the Underlying Wholeness of Creation; The Task of Modern Art; Architecture Proposals for the Architecture of a Model Anthroposophical Community at Dornach. Part Two: Ways to a New Style of Architecture; True Artistic Creation; Art As the Creation of Organs through which the Gods Speak to Us; A New Concept of Architecture; The Aesthetic Laws of Form; The Creative World of Color; Appendix: The Evolution of Architecture at the Turn of Each New Millennium; Notes; Color Plates. *Architecture as a Synthesis of the Arts* is a translation from German of *Wege zu einem neuen Baustil Und der Bau wird Mensch*. **Rudolf Steiner als Architekt von Wohn- und Zweckbauten**
Erich Zimmer, 1971 A Life for the Spirit Henry Barnes, 1997-07 Whether or not Steiner's insights are valid is for each of us to determine. His work is not easy and he challenges our usual thinking every step of the way. The insights are radical in the original meaning of that word: they go to the roots. We are forced more and more to realize that only through such thinking can actions arise that are truly healing and constructive. Henry Barnes from the introduction: Few people today recognize Rudolf Steiner's name yet those who are aware of him know that his presence pervades every forward-looking aspect of contemporary life. Nearly all fields of life have been fructified by his insights, not abstractly or theoretically but in a concrete way that changes lives. No wonder then that Steiner has been called the best kept secret of the twentieth century. Born in 1861 in Kraljvec, Austria, Steiner showed evidence early on of the most varied gifts: a precise and probing scientific mind combined with a natural clairvoyant ability to see into the spiritual world; a determined need to think things through for himself and a profound reverence for the divine. He first made his mark as a philosopher and the editor of Goethe's scientific writings. He also recognized the revolutionary spirit in Nietzsche. But Steiner's destiny led him in a different direction. Profound cognitive experiences determined that his task would lie in service to the spirit. While recognizing the integrity of

modern science's phenomenological empiricism he also knew that the time had come to extend the field of science to include investigation of the supersensible. Working at first within the Theosophical Society but always speaking and writing out of his own experience, Steiner developed the foundations for a thoroughly modern spiritual scientific discipline that would transform spiritual and cultural life. Until his death in 1925, in countless lectures and books, Steiner created the body of knowledge and practice known as anthroposophy, which not only challenged and extended the underlying methods of modern knowledge but stimulated many practical cultural initiatives such as Waldorf education, biodynamic agriculture, the art of eurythmy, the movement for a threefold social order, and anthroposophical medicine.

Henry Barnes, the author of *Into the Heart's Land: A Century of Rudolf Steiner's Work in North America*, recounts the dynamic life of this remarkable man. He does so by placing Steiner in the crosscurrents of history and showing him not as a spectator or ivory tower philosopher but as a leading actor in the drama, one whose entire being was given in service to humanity and to the spirit.
