Genealogy of Obedience Justyna Wlodarczyk, 2018-08-27 In Genealogy of Obedience Justyna Wlodarczyk provides a long overdue look at the history of companion dog training methods in North America since the mid nineteenth century when the market of popular training handbooks emerged Wlodarczyk argues that changes in the functions and goals of dog training are entangled in bigger cultural discourses with a particular focus on how animal training has served as a field for playing out anxieties related to race class and gender in North America By applying a Foucauldian genealogical perspective the book shows how changes in training methods correlate with shifts in dominant regimes of power It traces the rise and fall of obedience as a category for conceptualizing relationships with dogs **When Species Meet** Donna J.

Haraway, 2013-11-30 In 2006 about 69 million U S households had pets giving homes to around 73.9 million dogs 90.5 million cats and 16.6 million birds and spending more than 38 billion dollars on companion animals As never before in history our pets are truly members of the family But the notion of companion species knotted from human beings animals and other organisms landscapes and technologies includes much more than companion animals In *When Species Meet* Donna J Haraway digs into this larger phenomenon to contemplate the interactions of humans with many kinds of critters especially with those called domestic At the heart of the book are her experiences in agility training with her dogs Cayenne and Roland but Haraway's vision here also encompasses wolves chickens cats baboons sheep microorganisms and whales wearing video

cameras From designer pets to lab animals to trained therapy dogs she deftly explores philosophical cultural and biological aspects of animal human encounters In this deeply personal yet intellectually groundbreaking work Haraway develops the idea of companion species those who meet and break bread together but not without some indigestion A great deal is at stake in such meetings she writes and outcomes are not guaranteed There is no assured happy or unhappy ending socially ecologically or scientifically There is only the chance for getting on together with some grace Ultimately she finds that respect curiosity and knowledge spring from animal human associations and work powerfully against ideas about human exceptionalism ... oder einfach so! How to Train Your Dog with Love + Science Annie Grossman, 2024-09-10. Finally, a dog training book that makes sense for both dogs and humans, using positive reinforcement techniques based on animal behavioral science. For generations, celebrity trainers have preached that dog owners must dominate dogs, and have criticized people for daring to treat pets with affection. **How To Train Your Dog with Love Science** presents a modern, science-based approach to dog training, showing how behavior can be changed without coercion and force. Annie Grossman, a journalist turned dog trainer, breaks down what positive reinforcement actually is and makes the case that good dog training may even be a window into understanding ourselves. Grossman offers building block exercises and tips on how to train effectively using the reward-based methods she's honed over the last decade with clients at her Manhattan training center, School For The Dogs. Whether you've just brought a new dog into your home or you're wanting to teach an old one new tricks, **How to Train Your Dog with Love Science** will help you consider what behaviors you want and help you to achieve your goals using techniques rooted in the science of behavior. Woven into this lively how-to guide is the century-long history of positive reinforcement training, from Pavlov's dogs and Skinner's rats to today's apartment-dwelling dogs using Wi-Fi-enabled devices. By employing the easy-to-understand techniques laid out in this book, you will be able to train your dog to live confidently, comfortably, and happily in your world.
