Peter J. Larkham

Ruins Their Preservation And Display A Colonnade:

The Aesthetics of Ruins Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience Its argument draws upon over 100 illustrations prepared in 40 countries Ruins flourish as matter form function incongruity site and symbol Ruin underlies cultural values in cinema literature and philosophy Finally ruin guides meditations upon our mortality and endangered world *Architecture in Conservation* James Strike, 1994 He explains the way in which the methods of producing good developments relate to our very perception of history and addresses the practical problems involved in developing appropriate sites Case studies from around the world demonstrate the potential of each approach **The Unfinished Manner** Elizabeth Wanning Harries, 1994 The Unfinished Manner examines the fragments produced by European writers and artists in the eighteenth century and earlier fragments that were not the result of an inability to finish either texts or buildings but rather deliberate refusals to make the traditional gestures of conclusion Most books published in the past few years on the fragment and the unfinished see it as a peculiarly Romantic early nineteenth century exclusively poetic form Elizabeth Wanning Harries argues instead that the fragment not only had a long history beginning with Petrarch but also played an important part in the history of the novel and other kinds of prose Conceptualizing the fragment as a genre Harries sheds a new light on the practice of reading fiction and reading ruins in the eighteenth century complex practices that often require oscillation between two perspectives or ways of reading She also explores the gendering of forms in eighteenth century aesthetics the perception of fragments as feminine beautiful rather than masculine sublime and speculates on the fragment s meaning within the context of eighteenth century social mythologies as well as those of later eras Finally she rereads Coleridge s Kubla Khan to show its roots in eighteenth century fragmentary textual practices The Unfinished Manner takes up the questions that arise when writers and artists treat apparently unfinished forms fragments ruins torsos sketches as finished both in the eighteenth century and implicitly today Harries s treatments of Petrarch as the initiator of the fragment tradition of Sterne in relation to biblical criticism of Coleridge s Kubla Khan in relation to Sterne s Tristram Shandy and of fragments in their relation to the feminine are original and revisionary contributions that seriously challenge some critical assumptions about Romanticism and its relationship to eighteenth century texts BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Ruin Nation Megan Kate Nelson, 2012 During the Civil War cities houses forests and soldiers bodies were transformed into dead heaps of ruins novel sights in the southern landscape How did this happen and why And what did Americans northern and southern black and white male and female make of this proliferation of ruins Ruin Nation is the first book to bring together environmental and cultural histories to consider the evocative power of ruination as an imagined state an act of destruction and a process of change Megan Kate Nelson examines the narratives and images that Americans produced as they confronted the war s destructiveness Architectural ruins cities and houses dominated the stories that soldiers and

civilians told about the savage behavior of men and the invasions of domestic privacy The ruins of living things trees and bodies also provoked discussion and debate People who witnessed forests and men being blown apart were plagued by anxieties about the impact of wartime technologies on nature and on individual identities The obliteration of cities houses trees and men was a shared experience Nelson shows that this is one of the ironies of the war s ruination in a time of the most extreme national divisiveness people found common ground as they considered the war s costs And yet very few of these ruins still exist suggesting that the destructive practices that dominated the experiences of Americans during the Civil War have been erased from our national consciousness

Postapocalyptic Fantasies in Antebellum American

Literature John Hay,2017-10-05 Even before the Civil War American writers were imagining life after a massive global catastrophe For many the blank slate of the American continent was instead a wreckage strewn wasteland a new world in ruins Bringing together epic and lyric poems fictional tales travel narratives and scientific texts Postapocalyptic Fantasies in Antebellum American Literature reveals that US authors who enthusiastically celebrated the myths of primeval wilderness and virgin land also frequently resorted to speculations about the annihilation of civilizations past and future By examining such postapocalyptic fantasies this study recovers an antebellum rhetoric untethered to claims for historical exceptionalism a patriotic rhetoric that celebrates America while denying the United States a unique position outside of world history As the scientific field of natural history produced new theories regarding biological extinction geological transformation and environmental collapse American writers responded with wild visions of the ancient past and the distant future

Building

A New Heritage (RLE Tourism) Gregory Ashworth,Peter Larkham,2013-05-20 At the heart of the European debate lies the tension between the idea of European unity and individual state identities and nationalisms This volume provides an insight into this dichotomy by exploring the role of heritage in the new Europe The main theme of this book is that a number of possible heritages can be shaped from the European past depending on the purposes for which they are intended Through different methods of management intervention heritage can fulfil a variety of functions becoming a major commercial resource in the form of the tourism industry or enlisted in the creation and maintenance of place identities Leading contributors look at different perceptions of heritage by different cultures and the social and political consequences of heritage planning The nature of heritage planning for emerging spatially fragmented state structures is also discussed

Public Archaeology Nick Merriman,2004-08-02 Scrutinizing in detail the relationship between archaeology heritage and the public this much needed volume explores public interest and participation in archaeology as a subject worthy of academic attention in its own right Examining case studies from throughout the world from North America Britain Egypt and Brazil to East Africa China and beyond Nick Merriman focuses on two key areas communication and interpretation and stakeholders Constant reports of new discoveries protests over the destruction of sites and debates over the return of artefacts such as the Elgin marbles or indigenous remains testify to an increasing public interest in archaeology For students and scholars of this

archaeology and of its relationship with the public this will prove essential reading Conservation and the City Peter Larkham, 2002-03-11 It is a widely held belief that cities must change or they will wither and die One of the key problems of urbanization is how to cope with these changes while retaining the structures constructed and maintained by previous generations *Conservation and the City* is a study of conservation and change throughout the built environment city centres suburbs and even tiny villages and how the activities of conservation interact with the planning system Using detailed case studies from Britain and the Westernized world the author examines some of the key social economic and psychological ideas which support conservation as well as studying the urban landscape and the agents of change *Conservation and the City* seeks to understand urban conservation and in doing so presents possible solutions for managing change in the built environment of the future

Conservation and the City Peter J. Larkham, 1996 It is a widely held belief that cities must change or they will wither and die One of the key problems of urbanization is how to cope with these changes while retaining the structures constructed and maintained by previous generations *Conservation and the City* is a study of conservation and change throughout the built environment city centres suburbs and even tiny villages and how the activities of conservation interact with the planning system Using detailed case studies from Britain and the Westernized world the author examines some of the key social economic and psychological ideas which support conservation as well as studying the urban landscape and the agents of change *Conservation and the City* seeks to understand urban conservation and in doing so presents possible solutions for managing change in the built environment of the future

Building Conservation Philosophy John Earl, Andrew Saint, 2015-12-08 This is a book about ideas rather than techniques Public thirst for visible evidence of the past is not as it is often represented a recent phenomenon It was already well developed when an overseer of ancient monuments was appointed in sixth century Rome But if the desire to preserve aspects of the past is to do more than respond to popular whims and fashions or represent the personal views of ivory towered scholars and specialists it needs to have some kind of solid logical basis Philosophical questions are raised at every turn On what basis can buildings be singled out as historic buildings demanding special protection On what authority can we justify interfering with private property rights in pursuing such protective processes And how should we judge what is acceptable and unacceptable in the treatment of the buildings we value In this third substantially revised edition the author examines the nature of monuments and the varied motives for preserving them He traces the history of movements to preserve old buildings and the furious conflicts that have frequently surrounded restoration campaigns Philosophical problems arising in modern conservation practice including such controversial issues as skin deep preservation and the use of substitute materials are considered in detail More space is devoted in this edition to contextual issues New sections deal with issues of sustainability and the relationship of buildings to the townscape and landscape The number of illustrations has also been greatly increased The book is designed especially for students approaching the subject for the first time but may well be found stimulating by practitioners No easy formulae are

offered What conservators have to nurture the author insists is an inquiring and self critical frame of mind enabling them to proceed from comprehensive knowledge of the buildings for the time being in their care via logical argument to defensible if not inevitable solutions

Culture, Heritage and Representation Steve Watson,2016-12-05 The visual has long played a crucial role in forming experiences associations expectations and understandings of heritage Images convey meaning within a range of practices including tourism identity construction the popularization of the past through a variety of media and the memorialization of events However despite the central role of the visual in these contexts it has been largely neglected in heritage literature This edited collection is the first to explore the production use and consumption of visual imagery as an integral part of heritage Drawing on case studies from around the world it provides a multidisciplinary analysis of heritage representations combining complex understandings of the visual from a wide range of disciplines including heritage studies sociology and cultural studies perspectives In doing so the book provides a comprehensive overview of the theoretical and methodological tools necessary for understanding visual imagery within its cultural context

Using Data Science and Landscape Approach to Sustain Historic Cities Ali Moazzeni Khorasgani,2024-09-13 This book comprehensively explores sustaining historic cities using a landscape approach and data science The author offers valuable insights for professionals and enthusiasts interested in preserving and developing urban heritage through a data driven approach Drawing on the synergy between landscape architecture and data science the book delves into the intricate interplay between historical cultural and environmental factors in urban settings Readers will understand how to navigate historic cities complex challenges through case studies research findings and practical methodologies The book equips readers with innovative strategies for preserving the authenticity of these cities while embracing sustainable development practices By blending theory and real world applications this book is a comprehensive guide for creating thriving resilient and culturally rich urban environments

Your Monument Our Shrine Webber Ndoro,2001 **Routledge Library Editions: Tourism** Various,2021-02-25 This set re issue 5 volumes originally published between 1985 and 1994 They focus on the impact of environmental issues on tourism management tourism demand and forecasting the key methods of operation of companies within the industry the functional areas of marketing finance organization and staffing research and innovation corporate strategy Multi disciplinary and international in its coverage with particular emphasis on Europe this collection will be of interest to students and libraries in the areas of geography tourism and marketing

American Ruins Camilo J. Vergara,1999 Photographer and sociologist Camilo Jos Vergara has spent years documenting the decline of the built environment in New York City Newark and Camden New Jersey Philadelphia Baltimore Chicago Gary Indiana Detroit and Los Angeles

The Past is a Foreign Country David Lowenthal,1985-11-14 Lowentahal looks at the benefits and burdens of the past how we study the past and how we change it

Handbook for British and Irish Archaeology ,1997 A one stop truly comprehensive dedicated and reliable sourcebook for archaeology

The Journal of Hellenic Studies ,1893 **Historic**

Construction and Conservation Pere Roca, Paulo B. Lourenço, Angelo Gaetani, 2019-07-03 Conservation in the built environment raises fundamental questions which have been debated for centuries what is worth preserving how is it possible why is it important This book takes a modern approach to the meaning of a heritage structure and its conservation The historical evolution of conservation is briefly addressed considering prominent individuals and cases along with the history of construction focusing on materials and related structural elements with insight on the sizing rules adopted by masons This explains structural decisions made during the construction process and allows comparison of scientific theories from the 18th century to modern understanding of limit analysis Damage and collapse mechanisms for masonry construction as the most widespread structural form for historical buildings is described Excess permanent loading and settlement is differentiated from environmental and anthropogenic actions such as earthquake or incorrect intervention The team of authors brings together unique expertise with high level research and leading practice with archetypical cases from around the world The book addresses the history of conservation by exploring materials and structures and the history of construction and damage so it is of value to students and professionals in civil engineering and architecture as well as archaeologists and art historians

Journal of the Royal Institute of British Architects ,1894
