Entextualizing Domestic Violence Jennifer Andrus, 2015 This book explores how language ideologies circulated in the hearsay rule of the Anglo American law of evidence create the potential to speak for and or ignore the speech of victims of domestic violence using discourse analysis to identify the particular mechanisms in case law and statute that do this work

Bronislaw Malinowski's Concept of Law Mateusz Stępień, 2016-09-26 This book discusses the legal thought of Bronislaw Malinowski 1884 1942 undoubtedly one of the titans of social sciences who greatly influenced not only the shape of modern cultural anthropology but also the social sciences as a whole This is the first comprehensive work to focus on his legal conceptions while much has been written about his views on language magic religion and culture his views on law have not been fairly reconstructed or recapitulated A glance at the existing literature illustrates how little has been written about Malinowski s understanding of law especially in the legal sciences This becomes even more evident given the fact that Malinowski devoted much of his scholarly work to studying law especially in the last period of his life during which he conducted broad research on law and primitive jurisprudence The main aim of this book is to address this gap and to present in detail Malinowski s thoughts on law The book is divided into two parts Part I focuses largely on the impact that works of two distinguished professors from his alma mater L Dargun and S Estreicher had on Malinowski s legal thoughts while Part II reconstructs Malinowski s inclusive broad and multidimensional understanding of law and provides new readings of his legal conceptions mainly from the perspective of reciprocity The book offers a fresh look at his views on law paving the way for further studies on legal issues inspired by his methodological and theoretical achievements Malinowski s understanding of law provides a wealth of fodder from which to formulate interesting research questions and a solid foundation for developing theories that more accurately describe and explain how law functions based on new findings in the social and natural sciences

Speak English Or What? Philipp Sebastian Angermeyer, 2015 This book presents a study of interpreter mediated interaction in New York City small claims courts drawing on audio recorded arbitration hearings and ethnographic fieldwork Focusing on the language use of speakers of Haitian Creole Polish Russian or Spanish the study explores how these litigants make use of their limited proficiency in English in addition to communicating with the help of professional court interpreters Drawing on research on courtroom interaction legal interpreting and conversational codeswitching the study explores how the ability of immigrant litigants to participate in these hearings is impacted by institutional language practices and underlying language ideologies as well as by the approaches of individual arbitrators and interpreters who vary in their willingness to accommodate to litigants and share the burden of communication with them Litigants are shown to codeswitch between the languages in interactionally meaningful ways that facilitate communication but such bilingual practices are found to be in conflict with court policies that habitually discourage the use of English and require litigants to act as monolinguals using only one language throughout the entire proceedings Moreover the standard distribution of interpreting modes in the courtroom is shown to disadvantage litigants who rely on the interpreter as consecutive interpreting causes their narrative testimony to be less coherent and more prone to interruptions while simultaneous interpreting often leads to incomplete translation of legal arguments or of their opponent's testimony Consequently the study raises questions about the relationship between linguistic diversity and inequality arguing that the legal system inherently privileges speakers of English

The Oxford Handbook of Law and Anthropology Marie-Claire Foblets, Mark Goodale, Maria Sapignoli, Olaf Zenker, 2022-04-01 The Oxford Handbook of Law and Anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social

organization and legal political and social identity The need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to acknowledge the points of tension open questions and areas for future development *Legal Theory and the Social Sciences* Maksymilian Del

Mar, Michael Giudice, 2017-07-05 Ever since H L A Hart's self description of The Concept of Law as an exercise in descriptive sociology contemporary legal theorists have been debating the relationship between legal theory and sociology and between legal theory and social science more generally There have been some who have insisted on a clear divide between legal theory and the social sciences citing fundamental methodological differences Others have attempted to bridge gaps revealing common challenges and similar objects of inquiry Collecting the work of authors such as Martin Krygier David Nelken Brian Tamanaha Lewis Kornhauser Gunther Teubner and Nicola Lacey this volume the second in a three volume series provides an overview of the major developments in the last thirty years The volume is divided into three sections each discussing an aspect of the relationship of legal theory and the social sciences 1 methodological disputes and collaboration 2 common problems especially as they concern different modes of explanation of social behaviour and 3 common objects including most prominently the study of language in its social context and normative pluralism **Legal Anthropology** James M.

Donovan, 2007-12-28 Legal Anthropology An Introduction offers an initial overview of the challenging debates surrounding the cross cultural analysis of legal systems Equal parts review and criticism James M Donovan outlines the historical landmarks in the development of the discipline identifying both strengths and weaknesses of each stage and contribution Legal Anthropology suggests that future progress can be made by looking at the perceived fairness of social regulation rather than sanction or dispute resolution as the distinguishing feature of law **Handbook of Justice Research in Law**

Joseph Sanders, V. Lee Hamilton, 2007-05-08 Justice a word of great simplicity and almost frightening scope When we were invited to edit a volume on justice in law we joked about the small topic we had been assigned Often humor masks fear and this was certainly one of those times Throughout the project we found daunting the task of covering even a fraction of the topics that usually fall under the umbrella of justice research in law Ultimately the organization of the book emerged from the writing of it Our introductory chapter provides a road map to how the topics weave together but as is so often the case it was written last not first It was only when we had chapters in hand that we began to see how the many strands of justice research might be woven together Chapters 2 4 on the basic forms of justice procedural retributive and distributive are the lynchpin of the volume they provide the building blocks that permit us to think and write about each of the other substantive and applied chapters in terms of how they relate to the fundamental forms of justice In the large central section of the

volume Chapters 5-9 the contributors address many ways in which the justice dimensions relate to one another. Most important for law is the relationship of perceptions of procedural justice and the two types of substantive justice: retributive and distributive.

Meaning and Power in the Language of Law Janny H. C. Leung, Alan Durant, 2018-01-18. Legal practitioners, linguists, anthropologists, philosophers, and others have all explored fundamental challenges presented by language in formulating, interpreting, and applying laws. Building on centuries of interaction between legal practice and jurisprudence, the modern field of law and language or forensic linguistics brings insights in linguistics and related fields to bear on topics including legal drafting and translation, statutory interpretation, expert evidence on language use, and dynamics of courtroom interaction. This volume presents an interlocking series of research studies engaged with different legal jurisdictions and socio-political contexts as well as with the more abstract notion of law. Together, the chapters written by international leaders in their fields highlight recent directions in research and investigate in particular how law expresses yet also conceals power relations in its crafted use of words and in the gaps and silence between those words.

The Anthropology of Law Fernanda Pirie, 2013-10-31. Questions about the nature of law, its relationship with custom, and the form of legal rules, categories, and claims are placed at the centre of this challenging yet accessible introduction. Anthropology of law is presented as a distinctive subject within the broader field of legal anthropology, suggesting new avenues of inquiry for the anthropologist while also bringing empirical studies within the ambit of legal scholarship. The Anthropology of Law considers contemporary debates on human rights, international laws, and new forms of property alongside ethnographic studies of order and conflict resolution. It also delves into the rich corpus of texts and codes studied by legal historians, classicists, and orientalists: the great legal systems of ancient China, India, and the Islamic world, unjustly neglected by anthropologists, are examined alongside forms of law created on their peripheries. Ancient codes, medieval customs, village constitutions, and tribal laws provide rich empirical detail for the authors' analysis of the cross-cultural importance of the form of law as text or rule, and carefully selected examples shed new light upon the interrelations and distinctions between laws, custom, and justice. Legalism is taken as the starting point for inquiry into the nature and functions of law and its roles as an instrument of government, a subject of scholarship, and an assertion of moral order. An argument unfolds concerning the tensions between legalistic thought and argument and the ideological or aspirational claims to embody justice, morality, and religious truth, which lie at the heart of what we think of as law.
