After the 'Socialist Spring' George Last, 2009-03-01 Historical analysis of the German Democratic Republic has tended to adopt a top down model of the transmission of authority However developments were more complicated than the standard state society dichotomy that has dominated the debate among GDR historians Drawing on a broad range of archival material from state and SED party sources as well as Stasi files and individual farm records along with some oral history interviews this book provides a thorough investigation of the transformation of the rural sector from a range of perspectives Focusing on the region of Bezirk Erfurt the author examines on the one hand how East Germans responded to the end of private farming by resisting manipulating but also participating in the new system of rural organization However he also shows how the regime sought via its representatives to implement its aims with a combination of compromise and material incentive as well as administrative pressure and other more draconian measures The reader thus gains valuable insight into the processes by which the SED regime attained stability in the 1970s and yet was increasingly vulnerable to growing popular dissatisfaction and economic stagnation and decline in the 1980s leading to its eventual collapse
