*Running Guns* Lora Lumpe, 2000-07 This volume is about the guns that fuel the huge toll of deaths in the world's most bloody conflicts at the turn of the century Whether it is Africa Sri Lanka or even Chechnya and Afghanistan it is not heavy weaponry or hi tech devices that kill the most people but the flood of cheap easy to get small arms that has swept over so many countries in the 80s and 90s Crime rates involving guns within countries have also soared as South Africa and Kenya for example have experienced Yet a lot of this cross border arms trade is illegal So much so that several governments including the United States Canada and Mexico are now pressing for rapid negotiation of a new global treaty on illegal trafficking in small arms

*The Sulu Arms Market* Lino Miani, 2011 Situated in a remote area long a historical buffer zone between competing political entities the Sulu Arms Market is an illicit market of a typical form in that it is both a source and a destination for less than legal guns What makes the Sulu market unique is its longevity which is measured in centuries In modern times guns from the area supply conflicts and crime from Japan to Sri Lanka to Papua New Guinea and beyond and in turn the world pours guns and ammunition into Mindanao the Maluku Molucca Islands and to a lesser extent Malaysia and the rest of the Philippines Like most black arms pipelines the Sulu Arms Market is intertwined with piracy terrorism and the traffic of other illicit commodities Criminal gangs communists Moro independence groups and Islamic militants are all major players in the market making it a security problem for at least five member states of the Association of Southeast Asian Nations ASEAN

**Weaponomics: the global market for assault rifles** Phillip Killicoat, 2007 Abstract This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross country time series price index of Kalashnikov assault rifles A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation When controlling for other factors the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed

The Small Arms Trade Matthew Schroeder, Dan Smith, Rachel Stohl, 2012-12-01 Small Arms are responsible for over half a million deaths each year Despite this terrifying statistic millions of guns flow into the streets of the world each year It is a multi billion dollar industry and one which is barely regulated From AK 47s to M16 rifles from Terrorist owned shoulder fired missiles to child soldiers this enlightening guide reveals the disturbing reality behind the murky underworld of international arms trading Explaining how deals can often operate on the edge of legality and listing the world's main players it goes on to ask how the exchange of small arms can be tightened in the future Full of insight and anticipating the danger of ever lighter and more powerful weapons this is required reading for anyone who wishes to understand the world today and one of the key threats to development prosperity and international peace

*Weak Links* Stewart Patrick, 2011-05-23 Conventional wisdom holds that weak and failing states are the source of the world's most pressing security threats However our assumptions are based on anecdotal arguments not on a systematic analysis Analyzing terrorism transnational crime WMDs pandemic diseases and energy insecurity Stewart Patrick shows that while some global threats do emerge in failed states most of their weaknesses create misery only for their own citizenry Moreover many threats originate farther up the chain in wealthier and more stable countries like Russia and Venezuela *Weak Links* will force policymakers to rethink what they assume about state failure and transnational insecurity

Diplomatic Interventions K. Fierke, 2005-04-22 *Diplomatic Interventions* argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look at again from a new angle at international practice

**Disarmament Diplomacy and Human Security** Denise Garcia, 2011-02-08 This book assesses how progress in disarmament diplomacy in the last decade has improved human security In doing so the book looks at three cases of the development of international norms in this arena First it traces how new international normative understandings have shaped the evolution of and support for an Arms Trade Treaty the supply side of the arms trade and second it examines the small arms international regime and examines a multilateral initiative that aims to address the demand side by the Geneva Declaration and third it examines the evolution of two processes to ban and regulate cluster munitions The formation of

international norms in these areas is a remarkable development as it means that a domain that was previously thought to be the exclusive purview of states i.e. how they procure and manage arms has been penetrated by multiple influences from worldwide civil society. As a result, norms and treaties are being established to address the domain of arms and states will have more multilateral restriction over their arms and less sovereignty in this domain. This book will be of much interest to students of the arms trade, international security, international law, human security, and IR in general.

Denise Garcia is Assistant Professor in the Department of Political Science at Northeastern University Boston. She is author of *Small Arms and Security* (Routledge, 2006).

**Histories of Transnational Crime** Gerben Bruinsma, 2015-05-13

*Histories of Transnational Crime* provides a broad historical framework for understanding the developments in research of transnational crime over the centuries. This volume provides examples of transnational crime and places them in a broad historical context which has so far been missing from this field of study. The contributions to this comprehensive volume explore the causes and historical precursors of six main types of transnational crime: piracy, human smuggling, arms trafficking, drug trafficking, art and antique trafficking, corporate crime. The historical contributions demonstrate that transnational crime is not a novel phenomenon of recent globalization and that beyond organized crime groups, powerful individuals, governments, and business corporations have been heavily involved. Through a systematic historical and contextual analysis of these types of transnational crime, the contributions to this volume provide a fundamental understanding of why and how various forms of transnational crime are still present in the contemporary world. In the past two decades, the study of transnational crime has developed from a subset of the study of organized crime to its own recognized field of study covering distinct societal threats and requiring a particular approach.

*Encyclopedia of Business in Today's World* Charles Wankel, 2009-06-12

**The Arms Trade and International Law** Zeray Yihdego, 2007-11-16

Shortlisted for the 2008 Young Authors Inner Temple Book Prize. There are believed to be about 700 million small arms and light weapons (SALW) in the world, often contributing to highly destabilising security and other concerns in international law. SALW are the primary source of violations and abuses of humanitarian and human rights principles by states, rebels, terrorists, and criminals. Many consider them the real weapons of mass destruction of our time, causing about half a million deaths annually. The unrestricted international transfer of SALW by states, 99 states and 1000 companies involved in manufacturing and supply is one of the major contributory and aggravating factors of this crisis. Another is the illicit traffic in small arms. This book deals with the proliferation of SALW and their unregulated trade and transfer across borders. It addresses questions of definition, manufacturing, trade, transfer, and issues relating to state responsibility. The primary focus is on conventional small arms, in particular military style weapons. The book tackles the core and most divisive legal problem of whether or not the laws relating to arms control and relevant norms of international law provide substantive restrictions upon the transfer of small

arms by states The application of the norms of international peace and security non intervention humanitarian and human rights laws and evolved relevant customary rules of arms control relating to these norms are considered particularly carefully Questions of application and enforcement of relevant rules and institutional responses to the problem are also examined The UN began considering an arms trade treaty in 2006 the publication of the book at this critical moment in time will make a positive contribution towards shaping the debate and aims to further enhance understanding in an area where close analysis is required *Gun Crime in Global Contexts* Peter Squires,2014-06-27 Every year around three quarters of a million people die directly or indirectly as a result of gun violence with most deaths occurring in the poorest yet also most highly weaponized parts of the world Firearm proliferation 875 million global firearms is a direct contributor to both regional conflicts and to crime This book attempts to understand the inter related dynamics of supply and demand which are weaponizing the world Now over ten years after Peter Squires s *Gun Culture or Gun Control* the issues pertaining to gun violence and gun control have developed dramatically With *Gun Crime in Global Contexts* Peter Squires offers a cutting edge account of contemporary developments in the politics of gun crime and the social and theoretical issues that surround the problem This book contains an innovative political analysis of neo liberal globalization and weapon proliferation an overview of recent gun control debates and gang strategies in the UK an updated analysis of US gun politics self defence race and the culture war a critical analysis of US school and rampage shootings how they have impacted the gun debate and how different societies have responded to mass shootings an examination of the UN s development of an Arms Trade Treaty 2001 13 a discussion of weapon trafficking discussions about youth gangs around the world including those in Brazil Kenya West Africa Mexico and South Africa With its interdisciplinary perspective and global reach this book will be important reading for academics and students interested in youth and gang crime violent crime and comparative criminal justice as well as peace and security studies and international relations **West Africa's Security Challenges** Adekeye Adebajo,Ismail O. D. Rashid,2004 Provides a context for understanding West Africa s security dilemmas highlighting the link between failures of economic development governance and democratization on the one hand and military insecurity and violent conflicts on the other The Law of Armed Conflict and the Use of Force Frauke Lachenmann,Rüdiger Wolfrum,2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law *Historical Dictionary of Arms Control and Disarmament* Jeffrey A. Larsen,James M. Smith,2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers Jeffrey A Larsen and James M Smith present a context for the broader range of international relations at a given point in time extending the utility of the dictionary beyond just a narrow examination of arms control BOOK JACKET
