Running On Ritalin:

Running on Ritalin Lawrence H. Diller, 2009-09-23 In a book as provocative and newsworthy as *Listening to Prozac* and *Driven to Distraction* a physician speaks out on America's epidemic level of diagnoses for attention deficit disorder and on the drug that has become almost a symbol of our times Ritalin In 1997 alone nearly five million people in the United States were prescribed Ritalin most of them young children diagnosed with attention deficit disorder Use of this drug which is a stimulant related to amphetamine has increased by 700 percent since 1990 And this phenomenon appears to be uniquely American 90 percent of the world's Ritalin is used here Is this a cause for alarm or simply the case of an effective treatment meeting a newly discovered need Important medical advance or drug of abuse as some critics claim Lawrence Diller has written the definitive book about this crucial debate evenhanded wide ranging and intimate in its knowledge of families schools and the pressures of our speeded up society As a pediatrician and family therapist he has evaluated hundreds of children adolescents and adults for ADD and he offers crucial information and treatment options for anyone struggling with this problem *Running on Ritalin* also throws a spotlight on some of our most fundamental values and goals What does Ritalin say about the old conundrums of nature vs nurture free will vs responsibility Is ADD a disability that entitles us to special treatment If our best is not good enough can we find motivation and success in a pill Is there still a place for childhood in the performance driven America of the late nineties

The ADHD Explosion and Today's Push for Performance Stephen P. Hinshaw, Richard M. Scheffler, 2014-04 Attention deficit hyperactivity disorder ADHD is one of the most controversial and misunderstood medical conditions today With skyrocketing rates of diagnosis and medication treatment it has generated a firestorm of controversy Alarming questions have been raised about ADHD in recent years including Why are one in nine children and adolescents in the U S now diagnosed with ADHD with projected rates still rising Why are nearly 70% of those diagnosed with ADHD prescribed medication What is causing the fast rising diagnosis and

medication of adults And why are over a quarter of all college students using stimulants for academic performance In some southern states why are boys over 9 years old diagnosed at rates of almost one in three Can we trust the stories we read and hear about ADHD even in major media outlets What is driving the current ADHD explosion is it parents doctors schools culture the healthcare system or Big Pharma And will it end Stephen Hinshaw a distinguished psychologist and Richard Scheffler an eminent health economist uniquely blend clinical wisdom current science medical and school policy and global trends to debunk myths and set the record straight in *The ADHD Explosion* They describe the origins of ADHD and its huge costs to society the science behind its causes as well as medication and behavioral treatment and the variation in diagnosis and treatment across the U S Dealing directly with stimulants as smart pills they describe the epidemic of medicalization arguing that accurate diagnosis and well monitored care could ease the staggering economic burden linked to ADHD In innovative ways they unravel the many poignant issues facing children teachers clinicians and family members who contend with ADHD each day The recommendations they make can improve the quality of life for those touched by ADHD and potentially improve the productivity and safety of all society *Medicating Children* Rick Mayes, Catherine Bagwell, Jennifer L. Erkulwater, 2009-01-31 Integrating analyses of clinical political historical educational social economic and legal aspects of ADHD and stimulant pharmacotherapy Mayes and colleagues argue that a unique alignment of social and economic factors converged in the early 1990s with greater scientific knowledge to make ADHD the most prevalent pediatric mental disorder

The A.D.D. Nutrition Solution Marcia Zimmerman, 1999-06-07 The first scientifically proven effective all natural nutritional alternative to the much prescribed drug Ritalin Attention deficit disorder is a nutritional deficiency not a psychological condition This is the revolutionary discovery Marcia Zimmerman made during her ten years of research as a nutritional biochemist That conclusion led her to develop a diet that addresses the specific needs of the 17 million adults and children suffering from ADD Her easy to follow thirty day plan has been proven just as effective as Ritalin in relieving the symptoms of ADD Learn How women should boost their nutrition before conception to prevent ADD in their children Why boys are much likelier to be tagged as ADD than girls How to get a reliable ADD diagnosis Reasons why parents prefer a diet plan to prescription drugs for ADD children The effects of brain allergies on attention span Foods to avoid that may exacerbate ADD Fats and oils we all need to stay focused Calming effects of carbohydrates Concentration enhancing protein Why to stay away from simple sugars The dangers of artificial food ingredients and much more This important book will help us curb the epidemic growth of ADD in this country and change the way we treat those who have it now by addressing its source instead of merely treating its symptoms *Psychopharmacology Abstracts* ,1977 **How to Build a Better Human** Gregory E. Pence, 2012-08-17 Medicine has recently discovered spectacular tools for human enhancement Yet to date it has failed to use them well in part because of ethical objections Meanwhile covert attempts flourish to enhance with steroids mind enhancing drugs and cosmetic surgery all largely unstudied scientifically The little success to date has been

sporadic and financed privately In How to Build a Better Human prominent bioethicist Gregory E Pence argues that people if we are careful and ethical can use genetics biotechnology and medicine to improve ourselves and that we should publicly study what people are doing covertly Pence believes that we need to transcend the two common frame stories of bioethics bioconservative alarmism and uncritical enthusiasm and that bioethics should become part of the solution not the problem in making better humans
