prone and die younger What is jet lag and can anything help Why do teenagers refuse to get up in the morning and are the rest of us really larks or owls Why are most people born and die between 3am 5am And should patients be given medicines and operations at set times of day because the body reacts so differently in the morning evening and at night The answers lie in our biological clocks the mechanisms which give order to all living things They impose a structure that enables us to change our behaviour in relation to the time of day month or year They are reset at sunrise and sunset each day to link astronomical time with an organism s internal time
