Daniels, 2001-02-28 Public opinion polls consistently reveal the lack of confidence disillusionment and mistrust that citizens feel toward government Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government particularly through local sustainable programs As the case studies show often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf of their citizens once sustainable community programs are created citizens administer their own programs in collaboration with local officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling transportation microcredit site redevelopment pollution health care and hunger *Creating Sustainable Community Programs* is the first book on sustainable programs that is intended for an audience of public administration scholars researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments **Sustainable Regional**

recycled This book will be the first to capture all of the current work on this idea in a single integrated plan for designing the water centric cities of the future From new construction to the retrofitting of existing systems this book presents the case for a new urban relationship to water one with a more sustainable connection to the environment and the hydrological cycle Through case studies of successfully planned and built systems around the world the book will educate the reader about the need for a new approach to urban water management and make the case that these changes are not only possible but imperative

Responsibilities, Don Hall, 1998      Preserving the Legacy Allen G. Noble, Frank J. Costa, 1999-01-01 Though only a relatively recent topic of worldwide discussion and interest the concept of sustainable development traces its origins to the late eighteenth century when concern for resource conservation and environmental integrity first arose From this beginning the concern for sustainable development progressively expanded from being purely local to having a regional and national relevance and finally to being a global concern of import Preserving the Legacy examines this expansion while discussing several general approaches to the understanding and application of the concept of sustainability Also discussed are such weighty issues as the balancing of development aspirations with environmental management in developing countries and the means by which residents in an urbanizing region in a developed country can be induced to consider sustainable development as both a goal and a limiting factor in the conversion of agricultural land Offering both real world examples of sustainability issues and a forecast for the future of sustainability theory and practice this fascinating volume will prove invaluable to scholars of the environment geography and urban planning      *Under The Blade* Thomas Lyson, 2018-05-04 Under the Blade The Conversion of Agricultural Landscapes examines the patterns causes and consequences of current land use decisions in the United States particularly the conversion of farmland to housing roads and other development Changes in land use are the result of complex interactions among law economics landscape characteristics social and political forces ethics and aesthetics By examining farmland loss from each of these perspectives and then integrating the results into policy recommendations Under the Blade makes an important contribution to the ongoing debate on the optimal use of a finite resourceland In 1998 the last farm in Des Plaines Illinois was subdivided Seven acres along the Niobrara River in north central Nebraska sold for USD5700 per acre twenty times the price for agricultural use Waukesha County Wisconsin although still largely in agriculture has been almost entirely zoned for small lot subdivisions Nationwide the cumulative effect of thousands of individual land use decisions is an orgiastic devouring of the countryside that consumes at least 1 4 million acres of rural land each year and fragments a much larger area The effects on landscape functions include loss of agricultural production water pollution increases in local runoff and flooding loss of habitat and biodiversity and the loss of natural beauty In exchange we get malls retail strips and an ugly sprawl that degrades people and community How have we come to this and more importantly how might we find a better sustainable approach to the use of land Land use decisions are the result of complex interactions among law economics landscape characteristics population growth social and political forces ethics and aesthetics Under the Blade The Conversion of Agricultural Landscapes examines the loss of farmland and other rural lands from each of these perspectives and shows how interactions among different factors greatly complicate sustainable land management Included throughout the seven main chapters of the book are descriptions of some of the tools and strategies that can be used to preserve farmland and guide development The application of these tools is illustrated by 22 case studies of towns and regions throughout the United States each with a somewhat different challenge response and

degree of success or failure Dietrich Bonhoeffer a Protestant theologian hanged by the Nazis in 1945 stated that the ultimate test of a moral society is the kind of world that it leaves to its children Our current choices in the use of the land are among the most important factors shaping that future world and Under the Blade demonstrates that the quality of that future is far from certain     Planning Manual Charles E.
