Happiness and Economic Growth Andrew E. Clark, Claudia Senik, 2014-11-20 This volume arising from a PSE CEPREMAP DIMeco conference includes contributions by some of the best known researchers in happiness economics and development economics including Richard Easterlin who gave his name to the Easterlin paradox that GDP growth does not improve happiness over the long run Many chapters underline the difficulty of increasing well being in developing countries including China even in the presence of sustained income growth This is notably due to the importance of income comparisons to others adaptation so that we get used to higher income and the growing inequality of income In particular rank in the local income distribution is shown to be important creating a

beggar thy neighbour effect in happiness Wealth comparisons in China are exacerbated by the gender imbalance as the competition for brides creates a striking phenomenon of conspicuous consumption on the housing market Policy has to be aware of these effects This applies in particular to those who try to use self reported subjective well being in order to generate a social subjective poverty line which is a key issue in developing countries However the news is not only bad from the point of view of developing countries One piece of good news is that GDP growth often seems to go hand in hand with lower happiness inequality and thereby reduces the risk of extreme unhappiness The Workers' State Meets the Market Sarah Cook, Margaret Maurer-Fazio, 2013-10-23 Among the most dramatic changes to affect China in the 1990s is the upsurge in labour mobility and the emergence of a market driven system of labour allocation changes which profoundly affect the working environment and livelihoods of the Chinese people Papers in this collection draw on a wide variety of data sources to analyse key elements of this transformation The Oxford Companion to the Economics of China Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30 China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate How did the country do it How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades What does the detailed pattern of China's success and challenges look like at the sub sectoral and sub national levels and what does this mean for future policy How will China's role as a global economic player evolve The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past present and future 99 entries written by the leading China analysts of our time The topics covered include the China model future prospects for China China and the global economy trade and the Chinese economy macroeconomics and finance urbanisation industry and markets agriculture and rural development land infrastructure and environment population and labour dimensions of wellbeing and inequality health and education gender equity regional divergence in China and a selection of perspectives on some of China's provinces The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions Director General International Food Policy Research Institute Co Editor China Economic Review President Chinese Economists Society Assistant Director of Research at the IMF Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities *Adaptation, Poverty and Development* D. Clark, 2012-04-05 The first book to examine in detail the ways in which people adapt their understanding and behaviours towards poverty as a direct result to their experiences of poverty in developing countries including world leading academics and case studies from China India Ethiopia and South Africa *Ethnicity and Inequality in China* Björn A. Gustafsson, Reza Hasmath, Sai Ding, 2020-12-29 This book analyses the behaviour of ethnic minority groups in China using the first comprehensive national dataset dedicated to capturing the socio economic profile of ethnic minorities the China Household Ethnicity Survey CHES Managing ethnic diversity in China has become an increasingly important subject especially against the backdrop of the nation's rampant

economic growth and changing institutional behaviour The book has an analytical interest in looking at the benefactors of China's growth from an ethnic group dimension and notably how the economic life of the 55 ethnic minority groups compares to the Han majority It's one of the first publications to capture the heterogeneity of ethnic minority groups' socio-economic experience through intersectional analysis and multi-disciplinary approaches Contributing factors in explaining ethnic minorities' experiences in the urban labour market are also considered from how linguistic capital and migration patterns vary for ethnic minorities to the effects of pro-rural policies Underpinning these are questions about the extent to which happiness and discrimination impact the economic life of ethnic minorities Ethnicity and Inequality in China will prove an invaluable resource for students and scholars of economics sociology and contemporary Chinese Studies more broadly

Growth with Inequality Jinjun Xue, 2012 Many of the case studies draw upon original household surveys "Economic Growth and Income Inequality in China, India and Singapore" Pundarik Mukhopadhyaya, 2017-07-05 The world at large is watching both China and India as powerhouses of economic growth The two nations have achieved significantly high rates of economic growth ever since their respective economies liberalized in 1978 and 1991 Singapore despite its limited land size and almost total dependence on external trade has performed remarkably well and has moved from the third world to the first This book documents and explains the rapid economic growth of the three key Asian economies The book also looks at what has happened to income inequality in the context of superior growth performance It makes comparative assessments and examines the implications for the three nations Since free markets have nothing in them to produce a reduction in income inequality among persons' households one must at best hope for equality of opportunity notably reflected in identical schooling for all identical health care for all and minimal rather than vulgar inequality in housing This book is particularly useful for both China and India which may wish to study and learn from Singapore in regard to the policies programmes and projects aimed at ensuring equality of opportunity The book is backed by considerable expertise on the part of the researchers with demonstrated expertise through their publications spanning a few decades It is invaluable to those who are concerned with designing policies for developing countries aimed at rapid and inclusive economic growth This book has been made possible by the intellectual and financial support extended by the Global Asia Institute National University of Singapore
