Rural Development Principles And Practice:

Rural Development Theory and Practice Ruth McAreavey, 2009-06-02 Rural development is inherently viewed as a positive thing it is seen as something that brings together groups of individuals with automatic positive implications and outcomes Policy rhetoric frequently uses popular terms such as involvement participation and power sharing to describe rural development activities However the reality of experience on the ground does not necessarily concur with these ideals It is not always clear who ultimately benefits from rural development the State the community or rural development practitioners This book critically analyses key concepts associated with rural development policy and practice and using the concepts of power and micro politics to analyze rhetoric and reality reveals the intricacies of rural development Challenging popular ideals associated with rural development this book presents the notion of rural development less as a spontaneous all inclusive affair and more as a limited controlled and exclusive process Ultimately it contends that within structures of rural governance a regeneration power elite predominates development and regeneration activities *Community-based Approaches to Rural Development* David Bruce, Margaret Whitla, Mount Allison University. Rural and Small Town Research and Studies Programme, 1993 **Handbook of Research on Agricultural Policy, Rural Development, and Entrepreneurship in Contemporary Economies** Jean Vasile, Andrei, Subic, Jonel, Grubor, Aleksander, Privitera, Donatella, 2019-11-29 Promoting rural entrepreneurship is a necessary step to limit the negative effects of classical agricultural policy based on a linear process and attracting secondary resources to the economic process The analysis of agricultural policy and rural development in conjunction to entrepreneurship in terms of production may represent a further step in understanding the role and importance of diversifying the rural potentials in contemporary economies The Handbook of Research on Agricultural Policy Rural Development and Entrepreneurship in Contemporary Economies is an essential publication of academic research that examines agricultural policy and its impact on shaping future resilient economy in rural areas and identifies green business models and new business patterns in rural communities Covering a range of topics such as entrepreneurship product management and marketing this book is ideal for researchers policymakers academicians economists agriculture professionals rural developers business investors and students Rural development Kristof Van Assche, Anna-Katharina Hornidge, 2023-09-04 This book offers a unique perspective on rural development by discussing the most influential perspectives and rendering their risks and benefits visible The authors do not present a silver bullet Rather they give students researchers community leaders politicians concerned citizens and development organizations the conceptual tools to understand how things are organized now which development path has already been taken and how things could possibly move in a different direction Van Assche and Hornidge pay special attention to the different roles of knowledge in rural development both expert knowledge in various guises and local knowledge Crafting development strategies requires understanding how new knowledge can fit in and work out in governance Drawing on experiences in five

continents the authors develop a theoretical framework which elucidates how modes of governance and rural development are inextricably tied. A community is much better placed to choose direction when it understands these ties. *Rural Development* Katar Singh, 1986

Management and Development of Agricultural and Natural Resources in Egypt's Desert Ahmed A. Elkhoully, Abdelazim Negm, 2021-05-31 This book reviews the economic potential of various natural resources found in the Egyptian deserts that could help fill the food gap in Egypt e.g. the date palm, olives and domestic animals. Bearing in mind that the entire country is subject to arid or hyperarid climatic conditions, only a small portion (3% of total area) is agriculturally productive in comparison to the dominant deserts. These aspects combined with a growing population (ca. 100 million citizens) and water resources scarcity have produced severe adverse effects on natural resource utilization. This book presents innovative methods for addressing desert soil's key problems: soil erosion, salinity, pollution, decreased fertility, minerals, and weed and pest control. Its goal is to help authorities reclaim the desert and optimally utilize the minerals and the available natural resources to support the sustainability agenda 2030. Besides, it offers researchers guidance on remaining gaps and future research directions. Lastly and importantly, it provides essential information on investment opportunities in desert cultivation such as the fields of food, fodder, and medicinal plants.

Managing Development in a Globalized World Habib Zafarullah, Ahmed Shafiqul Huque, 2012-03-13 Traditionally, development has been rooted in ideologies and assumptions prevalent in the developed world and in practices and strategies adopted by leading industrial nations. However, historically eclectic ideas and approaches often clash with existing long-established notions of progress and modes of realizing social and economic change. *Managing Development in a Globalized World: Concepts, Processes, Institutions* explores this topic by incorporating ideas and interpretations that have previously been neglected or given inadequate attention in the discourse on developing countries. It underscores development as a continuous process that must be supported by sound policies and efficient management, supplying a wider understanding of the field. The authors argue that the application of innovative development techniques and best practices is essential for obtaining optimum results in meeting the needs of society. They examine the style of managing development with a new perspective that links the phenomenon with changing demands and the interplay of internal, external actors and a host of stakeholders. An exploration of key sectors in development provides clear comprehension of problems and solutions. A careful synthesis of theoretical, conceptual, and empirical literature, the book assesses real-world situations and provides insight into the operational dynamics of development policies, programs, and institutions. It focuses on goals, values, and dynamics of development management that are undergoing rapid changes and continue to be enhanced to alleviate poverty and improve living standards in an era of globalization and inter-regional and inter-institutional synergies. It highlights best practices essential for the efficient and effective delivery of human development services that are designed and put in place to obtain optimum results in meeting the needs of society.

Transdisciplinary Perspectives on Transitions to Sustainability Edmond Byrne, Gerard Mullally, Colin

Sage,2016-06-17 Demonstrating how a university can in a very practical and pragmatic way be re envisioned through a transdisciplinary informed frame this book shows how through an open and collegiate spirit of inquiry the most pressing and multifaceted issue of contemporary societal un sustainability can be addressed and understood in a way that transcends narrow disciplinary work It also provides a practical exemplar of how far more meaningful deliberation understandings and options for action in relation to contemporary sustainability related crises can emerge than could otherwise be achieved Indeed it helps demonstrate how only through a transdisciplinary ethos and approach can real progress be achieved The fact that this can be done in parallel to or perhaps underneath the day to day business of the university serves to highlight how even micro seed initiatives can further the process of breaking down silos and reuniting C P Snow s two cultures after some four centuries of the relentless project of modernity While much has been written and talked about with respect to both sustainability and transdisciplinarity this book offers a pragmatic example which hopefully will signpost the ways others can will and indeed must follow in our common quest for real progress

Regeneration Aylin Orbasli, Marcel Vellinga, 2020-08-03 A comprehensive and detailed overview of the active regeneration rehabilitation and revitalisation of architectural heritage The combined processes of globalisation urbanisation environmental change population growth and rapid technological development have resulted in an increasingly complex dynamic and interrelated world in which concerns about the meaning of cultural heritage and identity continue to grow As the need for culturally and environmentally sustainable design grows the challenge for professionals involved in the management of inherited built environments is to respond to this ever changing context in a critical dynamic and creative way Our knowledge and understanding of the principles approaches and methods to sustainably adapt existing buildings and places is

rapidly expanding Architectural Regeneration contributes to this knowledge base through a holistic approach that links policy with practice and establishes a theoretical framework within which to understand architectural regeneration. It includes extensive case studies of the regeneration, rehabilitation and revitalisation of architectural heritage from around the world. Different scales and contexts of architectural regeneration are discussed, including urban, suburban, rural and temporary. At a time when regeneration policy has shifted to the recognition that heritage matters and that the historic environment and creative industries are a vital driver of regeneration, an increasing workload of architectural practices concerns the refurbishment, adaptive re-use or extension of existing buildings. As a result, this book is ideal for undergraduate and graduate students of architecture, historic conservation, urban and environmental design, sustainability and urban regeneration, as well as for practitioners and decision makers working in those fields.
