The State of World Rural Poverty Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992 Despite almost four decades and billions of dollars in development activities we are barely in a position to track the changing dynamics of poverty or to define with conviction the processes that entrap the poor in their misery Accounting for about 90% of global poverty rural poverty through transmigration is also a main contributor to urban poverty It is in the rural areas of the world where poverty is most severe in human terms where the hunger hopelessness hardship and despair commonly associated with entrenched poverty are most pronounced where basic health services sanitation educational opportunities and other common amenities are most lacking The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety The State of World Rural Poverty offers the first comprehensive look at the economic conditions and prospects of the world's rural poor

Poverty Orientated Agricultural and Rural Development Hartmut Brandt, Uwe Otzen, 2006-12-20 Over the last twenty years the proportion of development cooperation resources earmarked for agricultural development has dwindled to between six and seven per cent of total bi and multilateral Official Development Assistance This is despite the fact that eighty per cent of the world's poor live in rural agricultural areas and that the poor are disproportionately affected when political military and natural events lead to regional or global food

shortages Brandt and Otzen's key book fills a gap in current literature undertaking a wide ranging conceptual reorientation of development cooperation criticizing the current orthodoxy and its bias towards urban areas and arguing that in order to effectively alleviate poverty across the world agricultural and rural development measures need to be implemented both by central and subnational governments aid agencies and the private sector The authors investigate the world food question the current pressures it is under and its link to rural poverty and set out the policies that need to be undertaken to reduce global poverty

D'Silva, Kaye Bysouth, 1992-01-01 Of the estimated 1 billion people in the developing world who survive in conditions of extreme poverty 70 percent live in Asia The majority of these people live in rural areas and agriculture is their main occupation Most of the rural poor are small and marginal farmers landless agricultural workers fisherfolk artisans female headed households the aged and infirm and children The incidence of poverty is highest among female heads of households and children The seminar on Poverty Alleviation through Agricultural Projects provided thirty development practitioners with an opportunity to consider strategies policies and practices that help alleviate rural poverty The seminar discussed four key issues of relevance to policy makers 1 poverty cannot be measured by income alone 2 poverty cannot be alleviated through a short term piecemeal approach 3 agricultural projects constitute one of the many means available to governments for alleviating rural poverty and 4 the role of public sector in poverty alleviation needs to be reconsidered

be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture's negative environmental effects be contained This year's report marks the 30th year the World Bank has been publishing the World Development Report

Poverty, Inequality and Rural Development David Greenaway, Tim Lloyd, Oliver Morrissey, 1994-07-12 Poverty alleviation is a major objective of development More than a fifth of the world's population lives in absolute poverty and the majority of the poor live in rural areas This volume studies what can be done for alleviating rural poverty Four chapters address the measurement of poverty and inequality including the use of household expenditure surveys and intra household income distribution Evidence is presented for India Mauritania Côte d'Ivoire and China Other chapters present case studies on strategies for rural development provision of rural credit in Bangladesh and India technical change in Philippine agriculture contract farming in Thailand and banana growers in the Windwards The contributions introduce the problems of rural development and show that effective rural development is assisted by investment in education and secure access to credit that equity is important for incentives but not directly related to poverty and that technical and institutional reform are essential but require careful design and implementation
