Rural Road Condition Survey Guide:

Rural Road Condition Survey Guide Curt A. Beckemeyer,1995 Developed to help provide a consistent means of assessing rural roadway conditions both within a country and statewide The roadway evaluation methodology described in this guide will provide county highway agencies with uniform and consistent means of defining pavement and roadway conditions By adopting a standard approach to rating the observable condition of a pavement or gravel surfaced road local road agencies can uniformly and objectively compare pavement conditions Illustrated Gravel Roads Ken Skorseth,2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads Very little technical help is available to small agencies that are responsible for managing these roads Gravel road maintenance has traditionally been more of an art than a science and very few formal standards exist This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as What is enough surface crown What is too much What causes corrugation The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right
