Film Policy in a Globalised Cultural Economy John Hill, Nobuko Kawashima, 2018-12-07 The past two decades have witnessed major changes in film industries worldwide in response to both economic globalisation and technological developments The dominant position of Hollywood movies in the global film market has remained largely uncontested but Hollywood itself has become increasingly international in its operations whilst regional screen industries such as those in East Asia and in the Indian subcontinent have re-emerged and developed new forms of collaboration The advent of digital technologies has also transformed the content of films and the ways in which they are made and consumed Such changes in turn have posed new economic and cultural challenges for policy makers around the world and led to a degree of rethinking of how film policy objectives are to be conceived defined and implemented This collection brings together a range of international scholars from the USA Europe and Asia to consider how film policy has responded to the various economic technological and political shifts shaping the global film industry and to identify the many tensions between global and local economic and cultural and public and private policy objectives that have been the result of these changes This book was originally published as a special issue of the *International Journal of Cultural Policy*

McAllister,2019-03-07 Steampunk Film A Critical Introduction is a concise and accessible overview of steampunk's indelible impact within film and acts as a case study for examining the ways with which genres hybridize and coalesce into new forms. Since the beginning of the 21st century a series of high profile and big budget films have adopted steampunk identities to re-imagine periods of industrial development into fantastical histories where future meets past. By calling this growing mass cultural fetishism for anachronistic machines into question this book examines how a retro futuristic romanticism for technology powered by cogs pistons and steam engines has taken center stage in blockbuster cinema. As the first monograph to consider cinema's unique relationship with steampunk it places this burgeoning genre in the context of ongoing debates within film theory each of which reflecting the movement's remarkable interest in reengineering historical technologies. Rather than acting as a niche subculture Robbie McAllister argues that steampunk's proliferation in mainstream filmmaking reflects a desire to reassess contemporary relationships with technology and navigate the intense changes that the medium itself is experiencing in the 21st century.
