Turner and the Art of Water Carmen Casaliggi, 2022-12-20 This book assesses Ruskin's and Turner's mutual interest in the theme of water with particular reference to *The Harbours of England* 1856 Ruskin's book on ships and marine art to which are appended Turner's 12 illustrations of the English ports By considering existing scholarly works on Ruskin and Turner the book begins by demonstrating that the two despite their widely acknowledged relations have rarely been examined in conjunction It raises the question as to how the subject of water inspired the intellectual aesthetic philosophical and scientific climate of the nineteenth century both in Britain and abroad and acknowledges the significance of the relationship between Ruskin and Turner in the context of aquatic studies Ruskin's childhood fascination with water is examined in detail while the scientific and spiritual importance of the subject in *Modern Painters* and *The Stones of Venice* is also emphasised and read in parallel with *The Harbours of England* a detailed account of which is given referring to both text and illustrations Turner's role in Ruskin's understanding of specific water pictures is also reconstructed The book demonstrates that water is important as a multifaceted compendium of contemporary themes for tradition progress nationalism and patriotism find their iconography in its depiction Considering the literary and painterly implications of wateriness the text concludes with a reflection upon the significance of the study of water for Ruskin and Turner and for their age *The Works of John Ruskin: Turner. Fagence Cooper, Richard Johns, 2019-05-19 *Ruskin Turner the Storm Cloud* presents new writing on John Ruskin's vision of art and its relationship with modern society and a changing environment. As part of the re-evaluation of Ruskin 200 years after his birth in 1819, art historians, scientists, geographers, artists, and curators explore the critic's lifelong commitment to the painted landscapes of J.M.W. Turner and his own artistic ambitions, as well as his prophetic concerns about the world's darkening skies, pollution, and psychological turbulence. In 1884, John Ruskin spoke out against an encroaching 'Storm Cloud'—a darkening of the skies that he attributed to the belching chimneys of the modern world. The imagery of the pollution-stained sky also allowed Ruskin to articulate the internal distress that seemed to engulf him. His analysis of a blighted sun, blighted grass, and a blinded man overwhelmed by a modern plague wind expresses both the visible climatic effects of industrialization and the effects of his own worsening mental health. Propelled by bereavement and anxieties over his religious faith, Ruskin became fixated on the skies, watching a cloud from four in the afternoon to four in the morning. This collection of essays examining Ruskin's distinctive blend of meteorology, morality, and social criticism brings new perspectives to one of the most influential and provocative thinkers of the nineteenth century. Ruskin's deep and personal engagement with Turner's work over many decades emerges as a recurring theme. In *Turner*, Ruskin found the ideal Modern Painter: an artist whose powerful sunrises and sunsets, mountains and storms inspired his own critical engagement with the natural world. As an artist and critic, Ruskin consistently challenged the way others experienced the world, encouraging his audiences to recognise and record nature's transient beauty and doing the same with his own intimately observed drawings of animals, flora, and weathered buildings. As an environmentalist, he witnessed a natural world changing before his eyes as the landscapes, buildings, and skies he had seen as a young man came under threat. As an ethical provocateur ahead of his time, he condemned the throwaway culture that spoilt the towns and rivers he loved, urging his audiences to take responsibility for these changes. Responding to this rich and troubled legacy, the book brings together original contributions by artists and curators, art historians, geographers, and climate change specialists, each of whom shares new insights into Ruskin's concerns about the changing weather patterns and shifting landscapes of the modern world. Individual essays reconsider Ruskin alongside a range of contemporary issues encompassing mental health, technology, environmental pollution, and climate change. The collection's diverse voices make a compelling case for the continuing relevance of Ruskin and his ways of seeing in the twenty-first century.
