**Biological Small Angle Scattering: Techniques, Strategies and Tips** Barnali Chaudhuri, Inés G. Muñoz, Shuo Qian, Volker S. Urban, 2017-12-07 This book provides a clear comprehensible and up to date description of how Small Angle Scattering SAS can help structural biology researchers SAS is an efficient technique that offers structural information on how biological macromolecules behave in solution SAS provides distinct and complementary data for integrative structural biology approaches in combination with other widely used probes such as X ray crystallography Nuclear magnetic resonance Mass spectrometry and Cryo electron Microscopy The development of brilliant synchrotron small angle X ray scattering SAXS beam lines has increased the number of researchers interested in solution scattering SAS is especially useful for studying conformational changes in proteins highly flexible proteins and intrinsically disordered proteins Small angle neutron scattering SANS with neutron contrast variation is ideally suited for studying multi component assemblies as well as membrane proteins that are stabilized in surfactant micelles or vesicles SAS is also used for studying dynamic processes of protein fibrillation in amyloid diseases and pharmaceutical drug delivery The combination with size exclusion chromatography further increases the range of SAS applications The book is written by leading experts in solution SAS methodologies The principles and theoretical background of various SAS techniques are included along with practical aspects that range from sample preparation to data presentation for publication Topics covered include techniques for improving data quality and analysis as well as different scientific applications of SAS With abundant illustrations and practical tips we hope the clear explanations of the principles and the reviews on the latest progresses will serve as a guide through all aspects of biological solution SAS The scope of this book is particularly relevant for structural biology researchers who are new to SAS Advanced users of the technique will find it helpful for exploring the diversity of solution SAS methods and applications Chapter 3 of this book is available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com)

Yielding,2017-11-06 Normal faults are the primary structures that accommodate extension of the brittle crust This volume provides an up to date overview of current research into the geometry and growth of normal faults The 23 research papers present the findings of outcrop and subsurface studies of the geometrical evolution of faults from a number of basins worldwide complemented by analogue and numerical modelling studies of fundamental aspects of fault kinematics The topics addressed include how fault length changes with displacement how faults interact with one another the controls of previous structure on fault evolution and the nature and origin of fault related folding This volume will be of interest to those wishing to develop a better understanding of the structural geological aspects of faulting from postgraduate students to those working in industry      **NASA Technical Paper** United States. Investigation of the Effects of Leading-edge Chord-extensions and Fences in Combination with Leading-edge Flaps on the Aerodynamic Characteristics at Mach Numbers from 0.40 to 0.93 of a 45 Degree Sweptback Wing of Aspect Ratio 4 Kenneth P. Spreemann,1957 This investigation was made to determine the effects of 6 degree full span and 3 degree partial span leading edge flaps in combination with chord extensions or fences on the aerodynamic characteristics of a wing fuselage configuration with a 45 degree sweptback wing of aspect ratio 4 taper ratio 0.3 and NACA 65A006 airfoil sections The investigation was made in the Langley high speed 7 by 10 foot tunnel over a Mach number range of 0.40 to 0.93 and an angle of attack range of about 2 degrees to 24 degrees Lift drag and pitching moment data were obtained for all configurations From overall considerations of stability and performance it appears that with the model of this investigation the 6 degree full span leading edge flaps in combination with the chord extension over the outboard 35 percent of the span with or without leading edge camber would be the most desirable configuration
