Challenges and Negotiations for Women in Higher Education Pamela Cotterill, Sue Jackson, Gayle Letherby, 2007-06-28 CONCEPTUALISING CHALLENGES AND NEGOTIATIONS FOR WOMEN IN HIGHER EDUCATION 1 2 3 Pamela Cotterill Sue Jackson and Gayle Letherby 1 2 3 Staffordshire University Birbeck University of London University of Plymouth INTRODUCTION Despite the historical tradition of academia as a male space Evans 1995 Abbott et al 2005 Stanley 1997 Letherby 2003 it is possible to argue that the expansion of higher education in the 1980s and

1990s benefited women more than it did men By 1995 there were two and a half times more women in the academy than in 1970 1 Abbott et al 2005 and in the decade to follow the numbers of women undergraduate students had overtaken men with a substantial minority of these being older non standard entrants Furthermore as Paula J Caplan 1997 3 argues Visions of the academic life draw us women toward it picturing an intellectual community whose members search with passion and integrity for Truth and Knowledge We imagine that in academia we shall find freedom from bias freedom from worldly struggles of power and wealth freedom to choose what to study and what to say and an environment characterized by tolerance and openness where everyone's energy is focused on the open exploration of ideas However whilst this may be the vision for some women it is important not to view this widening of female participation in higher education through rose tinted glasses

be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its naive theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences
