Biographies & Space Dana Arnold,Joanna Sofaer Derevenski,2007-12-11 Bringing together a collection of high profile authors Biographies and Space presents essays exploring the relationship between biography and space and how specific subjects are used as a means of explaining sets of social cultural and spatial relationships Biographical methods of historical investigation can bring out the authentic voice of subjects revealing personal meanings and strategies in space as well as providing a means to analyze

relations between the personal and the social Writing about both actual architectural and imagined pictorial space the authors consider issues of gender childhood sexuality and race highlighting an increasing fluidity and interaction between theory methods and history Biographies and Space is an original and exciting new book with direct relevance to both architectural and art history *The Revolutionary Kant* Graham Bird, 2006-04-28 There is a major division in the interpretation of Kant between traditionalists and revolutionaries Traditionalists tend to assimilate Kant to predecessors such as Leibniz Hume or Berkeley Revolutionaries take more seriously Kant's vehement repudiation of all the earlier empiricist rationalist realist idealist skeptical and dogmatic doctrines I, Me, Mine Béatrice Longuenesse, 2016-12-22 Béatrice Longuenesse presents an original exploration of our understanding of ourselves and the way we talk about ourselves In the first part of the book she discusses contemporary analyses of our use of I in language and thought and compares them to Kant's account of self consciousness especially the type of self consciousness expressed in the proposition I think According to many contemporary philosophers necessarily any instance of our use of I is backed by our consciousness of our own body For Kant in contrast I think just expresses our consciousness of being engaged in bringing rational unity into the contents of our mental states In the second part of the book Longuenesse analyzes the details of Kant's view and argues that contemporary discussions in philosophy and psychology stand to benefit from Kant's insights into self consciousness and the unity of consciousness The third and final part of the book outlines similarities between Kant's view of the structure of mental life grounding our uses of I in I think and in the moral I ought to on the one hand and Freud's analysis of the organizations of mental processes he calls ego and superego on the other hand Longuenesse argues that Freudian metapsychology offers a path to a naturalization of Kant's transcendental view of the mind It offers a developmental account of the normative capacities that ground our uses of I which Kant thought could not be accounted for without appealing to a world of pure intelligences distinct from the empirical natural world of physical entities **Place, Space and Hermeneutics** Bruce B. Janz, 2017-03-29 This book analyzes the hermeneutics of place raising questions about central issues such as textuality dialogue and play It discusses the central figures in the development of hermeneutics and place and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful It covers the range of philosophical hermeneutic theory both within philosophy itself as well as from other disciplines In doing so the volume reflects the state of theorization on these issues and also looks forward to the implications and opportunities that exist Philosophical hermeneutics has fundamentally altered philosophy's approach to place Issues such as how we dwell in place how place is imagined created preserved and lost and how philosophy itself exists in place have become central While there is much research applying hermeneutics to place there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place This book fills that void by offering a sustained analysis of the central elements major figures and disciplinary applications of hermeneutics and place
