Meaning and Argument Robert Goodwin Olson, 1969 **The Elements of Arguments: An Introduction to Critical Thinking and Logic** Philip Turetzky, 2019-03-30 The Elements of Arguments introduces such central critical thinking topics as informal fallacies the difference between validity and truth basic formal propositional logic and how to extract arguments from texts Turetzky aims to prevent common confusions by clearly explaining a number of important distinctions including propositions vs propositional attitudes propositions vs states of affairs and logic vs rhetoric vs psychology Exercises are provided throughout including numerous informal arguments that can be assessed using the skills and strategies presented within the text **Instructor's Manual for Meaning and Argument** Robert Goodwin Olson, 1969 *The Logic of the Articles in Traditional Philosophy* E.M. Barth, 2012-12-06 When the original Dutch version of this book was presented in 1971 to the University of Leiden as a thesis for the Doctorate in philosophy I was prevented by the academic mores of that university from expressing my sincere thanks to three members of the Philosophical Faculty for their support of and interest in my pursuits I take the liberty of doing so now two and a half years later First and foremost I want to thank Professor G Nuchelmans warmly for his expert guidance of my research A number of my most important sources were brought to my attention by him During the whole process of composing this book his criticism and encouragement were carried out in a truly academic spirit He thereby provided working conditions that are a sine qua non for every author who is attempting to approach controversial matters in a scientific manner conditions which however were not easily available at that time In a later phase I also came into contact with Professors L M de Rijk and J B Ubbink with both of whom I had highly stimulating discussions and exchanges of ideas The present edition contains some entirely new sections viz 1 9 IV 29 V 9 V 20 VII 14 iii iv VII 17 i VIII 22 IX 17 IX 19 X 9 and XI 8 Section X 9 was inspired by a remark made by Professor A **Argumentation, Communication, and Fallacies** Frans H. van Eemeren, Rob Grootendorst, 2016-07-22 This volume gives a theoretical account of the problem of analyzing and evaluating argumentative discourse After placing argumentation in a communicative perspective and then discussing the fallacies that occur when certain rules of communication are violated the authors offer an alternative to both the linguistically inspired descriptive and logically inspired normative approaches to argumentation The authors characterize argumentation as a complex speech act in a critical discussion aimed at resolving a difference of opinion The various stages of a critical discussion are outlined and the communicative and interactional aspects of the speech acts performed in resolving a simple or complex dispute are discussed After dealing with crucial aspects of analysis and linking the evaluation of argumentative discourse to the analysis the authors identify the fallacies that can occur at various stages of discussion Their general aim is to elucidate their own pragma dialectical perspective on the analysis and evaluation of argumentative discourse bringing together pragmatic insight concerning speech acts and dialectical insight concerning critical discussion Elements of logic Richard Whately (abp. of Dublin.), 1870 **Ad Hominem Arguments** Douglas

Walton,1998-09 Douglas Walton presents a clear account of the structure of the ad hominem argument and how that structure can be used to evaluate specific cases of this type of argumentation as fallacious or not *The Elements of Logic* Stephen Francis Barker,2003 This classic concise introductory logic text is designed for courses that cover both formal and informal logic The text covers a broad traditional range of topics and includes a large number of exercises which pointedly illustrate logical principles Answers to selected exercises are included in the study guide Meaning and Argument Ernest Lepore,Sam Cumming,2012-09-14 Meaning and Argument is a popular introduction to philosophy of logic and philosophy of language Offers a distinctive philosophical rather than mathematical approach to logic Concentrates on symbolization and works out all the technical logic with truth tables instead of derivations Incorporates the insights of half a century s work in philosophy and linguistics on anaphora by Peter Geach Gareth Evans Hans Kamp and Irene Heim among others Contains numerous exercises and a corresponding answer key An extensive appendix allows readers to explore subjects that go beyond what is usually covered in an introductory logic course Updated edition includes over a dozen new problem sets and revisions throughout Features an accompanying website at <http://rucss.rutgers.edu/logic/MeaningArgument.html>
